Stout Adds Graduate Dignity

(An Editorial)

First it was a two year institute on the secondary school level. The years passed; its graduates spread like a net over the country. Another year was added. Its graduates went even further afield and reflected more credit on the school. More years passed. A full four-year college took form, developed, and spread its influence through the men and women it trained on the practical arts teaching of America.

The more years passed. The faculty was graded up; the offerings studied minutely, revised and revised again. No longer were the men and women technicians only but teachers trained in the humanities and sciences as well as in their specialities. They were teachers equipped to hold their own in the complex environment of the modern secondary school.

So for years the college studied itself and its products. It sought affiliation with the standardizing agencies so that it could have collegiate recognition in all parts of the country. It built up a stronger departmental organization. And then, finally, with its work well established, its reputation completely justified, it sought the next logical step.

With this summer session Stout becomes a graduate school. The first session's registration surpassed expectations. Graduates to the number of more than 75 have already registered. Ahead stretches a period of years during which the Master's degree from Stout shall have growing importance in the country and those who possess it shall be everywhere in demand.

CHARLES PETERSON RECEIVES POSITION

Charles Peterson '35 graduate obtained a position as instructor at the Country Day School of Grosse Pointe, Mich. Mr. Peterson is employed this summer as director of crafts at Nissekone, YMCA boys camp at Oscoda, Mich. Grosse Pointe Country Day School is a private educational institution.

Students To Vote For Or Against Friday Recess

The question of possible arrangements for Friday, July 5, as a one day recess will be presented to the student body at the assembly today, Friday. As there will be no classes July 4, numerous requests have been made that Friday also be included in the recess.

The questions as they will be presented to the students will be:

Is it the desire of the majority of the student group to have no classes Friday, July 5, the work of the day being carried on a Saturday program?

If the majority vote to have no classes on Friday, the second question to be presented will read:

Is it the desire of the majority of the students to have the Saturday program come on the Saturday of June 29, or July 13?

Summer Party Is Friday Evening

Annual Summer Session Party Will Be Held in Gym at 8:30 in Evening

The All-School Get Acquainted Party will be held in the gymnasium building Friday evening, tonight, from 8:30 to 11. Dancing will be enjoyed in the gym while games and cards will be played in the adjoining rooms. Refreshments will be served.

Admittance will be by Coupon No. 1 on the Student Activities ticket. Students of the summer session may secure guest cards for members of their families at the door Friday evening. Faculty members and members of their families do not need tickets.

The orchestra for this party will consist of the group of Stout students and alumni who this summer will play as The Stout Institute Orchestra on the S. S. Samaria, of the Cunard White Star Line. They sail from New York on July 12, returning from Southampton Aug. 9. The men have all been active in the Stout band and active in the orchestra. The personnel: Ted Pierson, Ralph Betterly, John Barber, "Bud" Micheels, and Fred Curran.

Total Enrollment Reaches 346 Registration 41 More Than '34

HUGDAHL PLACED

Elwood Hugdahl '35 has received a position in the Waupaca Public high school where he will organize a new department of general shop. He will also direct the high school band.

Noted Writer To Address Students

Opens Assembly Programs for Session With "The New Ideal"

Sounding the national-social-situation "key-note" for the 1935 summer session, Rollo Walter Brown, internationally known writer, lecturer, and conference leader will address the school assembly this morning at 10:30 in the auditorium. His topic will be "The New Ideal."

It has been the plan the opening summer session assembly for several sessions to secure individuals who are national social leaders. Mr. Brown has been recognized as a pioneer in behalf of the creative spirit in American education and American life.

He has lectured before audiences at Harvard, Columbia, Mt. Holyoke, Bowdoin, University of Georgia, Washington and Lee, Ohio State, University of Cincinnati, Oberlin, Lindenwood, University of Michigan, DePauw, University of Wisconsin, University of Oklahoma, Texas State College for Women, Colorado State Teachers College, and more than 150 other institutions of learning.

Stoutonias Distributed Free To S. S. Students

During this summer session The Stoutonia will be delivered to the faculty and student body on Tuesday and Friday at noon at several points.

It is the present plan that the distribution points will be at the

Thirty-Seven More Men Than Women Entered in Graduate School

75 SEEK MASTER'S DEGREE

Home Economics Totals Four Greater Than 1934 Enrollment Figures

With the total enrollment on the fourth day of the 1935 summer session 41 students greater than the fourth day of the 1934 session, and 22 students greater than the first 1934 total, the present summer session enrollment reached a peak of 346 students at 5 o'clock yesterday, according to Miss O'Brien, registrar.

Of this total, 75 students are taking graduate work for the first time at Stout, and 271 students are taking undergraduate work.

The men outnumber the women in the master's degree work, with 56 men registered in industrial education, and 19 women enrolled in home economics.

On the fourth day of this session, Thursday, there were 135 men enrolled, as against 125 of the fourth day of the 1934 summer session. (Continued to page 3)

business office, the cafeteria, Lindenwood Hall, and the Camp Colony. These points may change or more points may be added as the staff sees fit.

Today only is the paper being delivered at assembly.

This summer is the first time that The Stoutonia has been delivered free to the reader twice a week.

The editor is asking for a volunteer to deliver the paper to the camp colony. This call has been out since the first day of school, but yet no one has stepped forward. It is a foregone conclusion that the residents of the camp colony want the paper. Everyone will want the paper a great help in keeping posted on school activities.

Volunteers to take the paper to the camp colony are asked to contact either George Hialop, editor, or Baker, printing instructor and adviser.

OUR INITIAL APPEARANCE

With this first issue of the summer session edition of The Stoutonia, we make our bow with the fervent prayer on our lips that we may continue to present all the news that's fit to print for the next five weeks. Whether or not the news is fit to publish after that time is another matter.

The paper will be issued twice each week, appearing at noon on Tuesday and Friday. These issues will supplant the usual official weekly notices that have formerly been used by the administration.

Primarily, the project is being undertaken by the printing class in the study of school publications. Through the experience they will gain through writing, editing, and make-up on this journalistic effort, they hope to gain invaluable experience in the various aspects of a school newspaper. Since the enrollment of the school this summer compares with that of many high schools in which weeklies are published, the experience gained will be closely correlated to actual conditions, both mechanical and journalistically, with that of the high school.

Students enrolled in the regular session at Stout are assisting in the publication. They have all had some experience on the paper during the past year and their help will be appreciated. This does not mean, however, that others may not work on the paper. Anyone who so desires to become acquainted with any phase of the paper is invited to participate in the issuance of this paper. Whether you teach any industrial course other than printing, or any home economics course, or perhaps you teach some of the academic courses, you may find a desire to become acquainted with the work of a small semi-weekly news paper. The staff of the paper will be glad to have your assistance and will endeavor to give you the experience you wish.

A CADDIE'S EYE-VIEW OF GOLF

Ever since the day the first golfer teed-up his ball on a little sand pattie and experienced the ecstasy that comes from slamming a white pellet solidly on the konk, a mild controversy has been waged between male and female followers of the pastime as to the relative golfing merits of the two sexes. But as far as I know, nobody has ever thought to settle the argument by consulting the one person who is really capable of passing judgment on such a subject. That person is the caddie.

If you are a golfer, you probably never waste a thought on what your caddie thinks of you, but the truth is that the youngster with the tattered pants and the tanned, raw face who carries your clubs, is a good deal wiser than you might imagine. Indeed, the chances are pretty good that he has you thoroughly sized up by the time you reach the first green. I speak with a certain amount of authority for I was once a caddie myself.

To begin with, the caddie profession is divided into two sharply defined groups. One prefers to caddie for women, the other prefers to caddie for men. The adherents of the latter group base their preference on the fact that men are more liberal "tippers."

Personally I preferred the women, for granting that the female of the species is more cautious than the male where monetary matters are concerned, it was my experience that if you flatter a woman enough by telling her what a peach of a drive she has, or what a knock-out her follow-through is, you can usually inveigle her into coming through with a sizable bonus.

Caddying for women has other advantages, too.

For one, a woman does not try to break her driver over a fellow's head just because she dubs her shot.

For another, a woman does not drive as far as a man and therefore it is comparatively easy to keep her ball in sight.

And finally, a woman carries only essential clubs and her bag is fairly easy to carry, while a man carries along every species of club conceivable and a couple of spare putters to boot. Confidentially, anyone who carries more than six clubs is either a hypocrite or an expert, and like as not he is the former.

Caddying for women has its disadvantages, however. Occasionally one must go around the course with a woman who has taken up golf more because it is the stylish thing to do, than because of any physical benefit she intends to derive. This type spends most of her time talking to her partners about "the new dress she is having made" or "the cute little fellow she met at the club dance the other night." At intervals her attention will wander back to her golf and she will ask, more for effect, than anything else, "Caddie, what club would you advise on this lie?" One is moved to tell her that she would do well to use a putter no matter what lie, but being a gentleman, he doesn't.

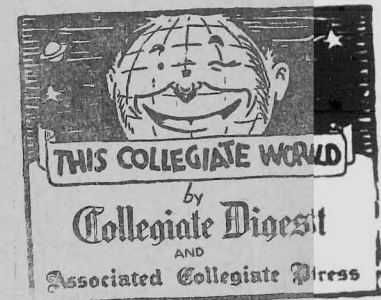

But enough of women. Let's look at the men.

Your average man golfer is a bluff fellow who is very cross when the going is tough, but a good natured egg, who treats you like a pal when he is hot.

The most disagreeable type of player to caddie for is the tight-lipped, sarcastic gentleman who is always saying, "Boy, don't forget to replace that divot," or "Boy, would you mind getting out of my line?" Incidentally, the word "boy" is very distasteful to a caddie. He doesn't mind being called "Sonny" or even "Buddy" but "Boy" savors too much of a servility and is frowned upon.

Yes, indeed, Golf is a great game but to really appreciate it, it has to be observed through the eyes of a caddie.

— Garold Bartsness in
The JPeptomist

New way to get through college with a minimum of effort—Unable to write as fast as a professor could talk, a Loyola university freshman hired a stenographer to take the lecture in shorthand.

The cadets at Virginia Military Institute have finally defined heredity—It is something a father believes in until his son starts to act like a fool.

Paradise has a new location. William Fairfield Warren, former president of Harvard, in a recent book, selects the North Pole as the location of the world's first nudist colony.

At the University of Edinburgh, Scotland, girls not only pay their own carfare when the boy friends take them home, but they must also pay for their theater tickets as well.

There is one young college lad in Chicago who has had it put right up to him by the boss: he can get rid of his girl or give up his job.

The young boy is a radio announcer in his spare time. Just the other evening, as he signed off the air, he crooned, "Thank you, listeners, for the hundreds of telephone calls praising this program."

Just as he said that the telephone booth light flashed off and the girl friend who stood by, thought it was the engineer's signal that the mike was dead. So she burst out, right into the ear drums of several thousand listeners no doubt: "Why, George, dear, only three calls have come in."

Registrar Places Several Grads

Home Economics placements that have been made during the past few months have been reported by Miss O'Brien, registrar. Twenty-one have been placed, and the number continues to grow every day:

Selma Anderson, Taylor; Doris Bradley, Spooner; Elizabeth Christopherson, Superior; Lucile Damm, Ondassagon, Helen Diedrich, Pennsylvania University Hospital, Jane

Green, University of Washington—Scholarship; Virginia Gunz, Oshkosh; Ramona Klatt, North Freedom; Mary Louise Nibbe, Roberts.

Alice Nichols, Baldwin; Marlyz Richert, Mount Hope; Amelia Smilnich, Okabena, Minn.; Dorothy Strese, Wausau Vocational school; Mary Swiston, Superior Vocational school; Marquette Healy, 1932, Fox Lake; Mary Green, 1930, Cochrane; Carmen Spreiter, Minnesota; June Very, 1934, Augusta; Mary Hryz, 1931, Ford Hopkins Drug Store, Fond du Lac; Esther Haise, 1932, Ford Hopkins Drug Store, Appleton; Rose Forno, Stambaugh, Mich.

sion. The home economics total for the 1934 summer school was 181 so that this session's enrollment is four students greater than that of last year.

Thursday's industrial education enrollment was 211 men, as against 180 of the same day last year. The grand total for the 1934 summer session was 193, a gain of 18 students in industrial education.

A few more registrations are expected but the administration expects all to be enrolled by Saturday morning.

Printing Students Publish Stoutonia

Budding Journalists Invite Paper-Minded Individuals To Participate

The Stoutonia is edited for the summer months by the Printing V students. Anyone interested in any phase of printing or journalism is invited to join the small staff.

The journalist or those doing any journalistic work are welcome to come over to the print shop and give a hand. It will be both helpful and interesting for him to get additional training in the work. Anyone having literary abilities may send over his work in order to give the readers an opportunity to read some of his or her work.

Editing of school papers is sponsored by students at the present time, so it will be advisable for those who may have to sponsor such a club in the future, to assist in the publication of The Stoutonia this summer.

Attempts are also made in the publication of this paper to use the most improved methods and systems of publications and management.

As there is much work and the class is small, the class would appreciate it if some experienced printers, journalists, poets, club leaders, etc., would come over to the publications room in the print shop and give a hand. The class

Dramatics Class Planning Plays

Three One-Act Plays to Be Presented During Last School Week

Three one-act plays will be presented by the class in dramatic coaching at an evening performance some time during the last of the session, according to Miss Violet M. Hassler, dramatics coach.

No definite time has been set for the production but that information will be given later. Although there are but a few in the class the plays will be first class performances as talent outside of the class will be used for some parts.

If any student is particularly interested in taking part in this activity he should see Miss Hassler some time during the first part of next week so plays may be chosen that will fit the cast.

These productions are for the benefit of the general public as well as the Stout students and will be free as usual. These productions have always been well attended in the past and so a good turnout is expected this year.

Miss Hassler has just returned from the school of speech at Northwestern University, Evanston, Ill., where she received her masters degree. She has taught in this department at The Stout Institute for five years.

Leon Lassers substituted for Miss Hassler during her recent leave of absence.

Students And Faculty Attend Convention

Miss Lusby, cafeteria manager, and foods instructor, returned from Chicago Thursday where she had been attending the American Home Economics convention at the Palmer House. She reports that about 2,000 registered their attendance at the convention.

Dean Ruth E. Michaels left yesterday for Chicago, where she will represent Stout for the remainder of the convention. Miss Houston, director of the nursery school, attended the convention the first part of the week.

Miss Joyce Shafer '36, honorary delegate sent to the convention by the Pallas Athene society, left for Chicago last Saturday to attend the convention. She will spend a few days at Kenosha with a class mate, Miss Dorothy Baun, on her return trip.

Stout alumnae and faculty met at the Carson, Pirie, and Scot tea room Tuesday noon. Those present were:

Miss Lusby, and Mrs. Houston of the Stout faculty, Hazel Wier, Doris Hery, Harriet Melges, and

Mary Swiston, Stout graduates, Helen Schnase, Marie Colter, Dorothy Lloyd, Merle Hill, all students at Stout, the last two being honorary delegates of the Home Economics club.

Summer Colonists Enjoy Camp Life

Eighteen Families of 63 Persons Make Up Camping Group

Sixty-three persons are enjoying themselves in the summer camp colony while 22 of them are attending school.

The 18 families made up of the 63 people in the camp colony come from seven different states, Minnesota, Nebraska, Michigan, Wisconsin, Iowa, Indiana, and California, being represented. Many of these people come back year after year to enjoy a cool restful summer in camp while going to school.

Mayor Coburn, who was elected last year for this year, with Mrs. Coburn and the three children, hail from Battle Creek, Mich. This is their fourth year as residents in the camp and Mrs. Coburn has nothing but praise for the clean, open, outdoor life, both for themselves and the children, there.

The oldest residents in the colony are Mr. and Mr. Eric Lang and their three children from Faribault, Minn. They were here when the camp was organized six years ago and haven't missed a summer since.

Life in the camp is congenial. The women have their club which meets once a week, where all the pleasures and problems of camping life, etc., are thoroughly shared and improved. The men have their volley ball, baseball and horseshoe teams and many other forms of recreation to take their minds off their cares.

A business meeting was to have been held Thursday night at which

Earl Burbidge Plans Recreational Activities

A large enrollment in swimming classes has been reported by Earl Burbidge, coach. The pool is open for this purpose from 10:30 until 12:30 in the morning for women and from 3:30 until 5:30 for men. A fee of \$1 permits anybody to use the pool during these periods, for both recreational and instructional purposes.

At present there has been no definite program made out for organized recreational athletics but as soon as school settles into a regular swing Mr. Burbidge intends

time the committee from the school consisting of Mr. Good, Mr. Hanson and Mr. P. C. Nelson were to meet with the colony members and elect aldermen and complete the organization for governing the camp.

Many Projects In Shop Activities

Stout Shops Show Wide Range Of Industrial Arts Activities

Shop courses supply wide range of activities to meet demands of summer school students.

Upholstering.

In the upholstering class, Mr. Curran has eight students. The project work being carried on by the students in this class is as follows:

Edwin L. Rudolph is reupholstering a davenport, including reinforcing the frame. Mohair covering is to be used. Charles Ilfingworth and Francis Grose are reupholstering an overstuffed davenport, using mohair covering. Clifford Culver and Clifford Leonard are reupholstering an overstuffed davenport, using new covering.

Wilmer B. Flory is upholstering a chair, including planning and ordering the covering. Lester Hawkes is building a spring seat for a rocker, while Alonzo Speece is reupholstering an overstuffed chair with wings, including measuring and planning for new covering.

Machine Shop.
The machine shop class, under Mr. Dockar, ranges from those who have been doing this work for many years. Mr. Paulus, of Cudahy Vocational school, is the oldest in the trade, with 12 years of experience to his credit. He is now on a job of cutting gears.

Mr. Dodd of Detroit, with eight years of experience, is chasing threads. Mr. De Roo, who is a

(continued to page 2.)

GILES HERE NEXT

Special effort is being made to arrange two days of conferences led by N. B. Giles, special agent for the United States Office of Education, Washington, D. C. Indications are now that he will be at The Stout Institute some time during the week beginning Monday, July 8. Details will be posted.

Statistics Show 21 States Represented

According to the tabulations on the fifth day of school in the office of Miss O'Brian, the registrar, 20 states and the District of Columbia are represented by the students enrolled in The Stout Institute. The records showing them according to states are:

	Under-Grads.	Graduates
Wisconsin	207	65
Michigan	10	0
Nebraska	5	0

District of Columbia	0	1

President Of Workshop Guild Will Hold Conferences July 9

PUBLISHERS' EXHIBIT

Two publishing company exhibits are scheduled for the entirety of next week, according to notice received from Dean Bowman's office.

The Manual Arts Press of Peoria, Ill., will have an exhibit of their publications in the main corridor of the Industrial Arts building, Monday, Tuesday, and Wednesday, July 8, 9, and 10.

It is possible that the Compton Company, through their special summer school representative, W. E. Young, will have an exhibit of the Compton Pictured Teachers' Material on Thursday and Friday, July 11 and 12.

That's What Those Tall Cans Are For!

Those tall waste receptacles at the entrances to the Home Economics and Industrial Arts buildings have taken a well deserved, but much lamented, rest since the summer session started. In other words, they exist for the sole purpose of receiving the unfinished portions of cigarettes that are abandoned when the nicotine fiend feels that his class is about to commence.

Regular session students found it difficult to flip the butts with force sufficient to open the flap on top, so it was obligingly bent and now stays open, thereby materially aiding and abetting the passage of the butts into the interior of the can.

Left-handed smokers will find the waste can at the entrance to the Home Economics building to be the easiest to hit, while right-handed smokers will find the Industrial Education building receptacle easier to hit. At least, the administration hopes so.

EPSILON PI TAU NOTICE

Members of Epsilon Pi Tau who are not affiliated with the Theta chapter of Stout Institute are asked to leave their names and local addresses with C. A. Bowman, director of summer school.

Informal Meetings Will Provide for Exchange of New Ideas

RYDER DISCUSSES CRAFTS

Guild Follows Trend of Nation for Better Use of Leisure Time

LaVerne T. Ryder of Rockford, Ill., president of the National Home Workshop Guild, will be on the campus Tuesday, July 9 according to C. A. Bowman, director of the summer session.

Informal conferences will be held from 9:30 to 12 in room 25 and from 1:30 to 3:30 in room 24 of the Industrial Education building.

There will be a general conference from 4 to 5 p.m. in room 22 of the same building, wherein Mr. Ryder will tell of the organization and plans of the National Home Workshop Guild and will discuss the contacts that teachers may make in their respective communities through the affiliations of the National Home Workshop Guild. Both men and women may attend any of these meetings.

The significant trend in the nation's increased avocational leisure time activities has been objectively indicated by the rapid growth of the Home Workshop Guild which now has 168 member clubs. During

(continued to page 5.)

Harvey Gordon Will Deliver Colony Paper

Harvey Gordon, of Winona, Minn., comes to the rescue of the circulation department, and volunteers his services in carrying The Stoutonias out to the camp colony on Tuesday and Friday noon of each week.

Mr. Gordon will distribute the papers from his tent as soon as he arrives in the colony, and will keep the supply there until he tires of giving four or five copies to some individuals who have fires to build.

For this meritorious work, Mr. Gordon will receive his just rewards, but at present it appears that he will get them in Heaven. However, he will get them; the staff is grateful to him for this service.

It Used to Be Sweets to The Sweet But It's Lemons to C. A. Bowman

Whether or not there exists any symbolism in the gift of oranges and lemons by Harold H. Cochrun, Los Angeles, Calif., to Dean Clyde A. Bowman is a mystery to many, even to the dean himself. No nine-area chart has been made by the dean to locate the incentive in the case; but a cart by the donor of the gift would probably have cleared up the trouble for Mr. Bowman.

Mr. Cochrun reports that he plucked the fruits in his own back yard just previous to the start of his trip to Wisconsin and thus Dean Bowman is assured that they are not just another bag of fruit from any of the local fruit stores.

Reports of any other such flagrant handshaking will be welcomed by The Stoutonia. It is doubted by those that have tried, however, that any effect will be forthcoming in the case of the afore-mentioned faculty member.

SHAPING OUR THOUGHT

It is only occasionally that we have a concrete instance of the power of the press; yet every day, coming and going, in eating, sleeping, riding, relaxing, we are being influenced by the journalism of the country. Whether that influence is constructive or destructive is at times a moot question. Surely there is much to be lamented in the way our tastes are formed, our passions aroused, our prejudices cultivated. But, on the other hand, the ideals of honest and constructive journalism that guide a few of the most important newspaper men of the country lead us to believe with them that the majority of papers are better than their readers.

Surely if the newspapers of the country at large were to maintain the informed and honest attitude maintained by high school and college newspapers, the better qualities in human nature would be fostered and our unwholesome appetites for scandal, for the sensational, for the gruesome details of executions and murders would lose social acceptance.

Commentators have frequently remarked the intelligent leadership of a school assumed by a lively well-staffed high school paper. In even more marked degree college newspapers have interpreted and in a large measure moulded college life and thought. It is a significant privilege and responsibility of college journalists, and it extends even into the smallest colleges. An alert college journalist must have his finger ever on the student pulse. College newspapers have risen to this challenge much more than have the rank and file of newspapers in the commercial world. They have fought for principles without thought of profit; they have not been afraid of change; they have had minds open to new ideas.

If the journalism of the greater world is to be all that we would have it, we must look for the major part of the impetus and the enthusiasm to come from the young men and women who formed their ideals of courage and truth in the journalism of high school and college. The techniques of the larger papers they can learn; the urge for honesty and decency they must carry with them.

The Lesson Plan

In pursuance of its policy of giving every possible aid to college students, the Line presents for the confusion of its readers this model lesson plan—all for your edification and tintinabulation, and for use in illustrative teaching.

IVY VINES
6th Geography
June 31, 1935

General Topic: Lapland.

Specific Topic: Canals of Lapland.
Text: Grimstein, Grimstein, Grimstein, and O'Malley. Outline of Inhuman Geography, pp. 799-987.

Pupil's References:

- (1) Ratz, Basic Fundamental Elements in Geographical Phenomena and Phobia for the Sixth Grade, Hiccough-Muffin Co., (Dead Indian Falls N. D., 1936).

Teachers References:

- (1) Candida, Through the Lymph Canals with Rod and Reel, Limpincatt & Co. (New York, 1842.)
- (2) Houdini, Key to the Gatun Locks, Quintupleday-Dionne Co. (Canada, 1935.)

Teacher's Aim: To help the kids like everything to a more mature conception of Lapland's canal system and what is found there.

SUBJECT MATTER

Introduction

- I. Modes of life in Lapland.

A. Recreational activities.

1. Dancing.
2. Murder.
3. Fleas.
- B. Social habits.
1. Sororities.
- a. Truth (?) sessions.
- b. Bull (?) sessions.
2. Making love.
- a. With club.
- b. With axe.
- c. With neighbor's wife.

Body

- II. Canal digging in Lapland.

A. Types of locks.

1. Locks.
2. Drainage.
3. Alimentary.
- B. Problems of construction.
1. Lacks.
2. Ex-lacks.
3. Foreign influence: Russians sitting on Laps.

Conclusion

- III. What we find in Lapland canals.

- A. Canal boats.
- B. Canal boats.
- C. Laps.
- D. Barrel staves.
- E. Melon rinds.

METHOD

Introduction

I. Well, kids, here we go again. Who remembers what I told you about Lapland yesterday? Nobody, of course. We were talking about

the way people live in Lapland, weren't we? Oh, yes, we were!

A. First we talked about the social habits of the Laplanders. What is the first social habit we mentioned? Sororities—that's correct. But we won't discuss it any further—the less said about sororities the better. Now, the second? How do the Laplanders make love? No, they don't rub noses—how silly. Now children, you can see from the things we have discussed that the Laplanders get around—they go places and do things. They are a live wire up and coming race of people. Now when we know that the Laps get around, a question immediately pops into our minds. What is it?

Pupil's Aim: I want to aim at and hit that kid across the aisle with a paper-wad right in the mush.

Body

II. That's it—how do the Laplanders get around by means of canals. Yes, ditches in the ground that the water flows through. What three kinds of canals do we know about? Well, it's spelled a-l-i-m-e-n-t-a-r-y. We'll take up the other two after we get that spelled.

Conclusion

Lapland has a mess of canals.

Editor's note: It's gratifying to learn that somebody somewhere else is pestered with the blooming lesson plans too. This column was clipped from The College Eye, of Cedar Falls, Iowa.

This Collegiate World

Get a glass of water handy, pry open an aspirin box and then read this:

The University of Pittsburgh is likely to be investigated by the state legislature. And for what? Because they want to see if there is anything to the charges that the University is too conservative! — And at the same time, efforts for campus investigations are going on in Illinois, New York, Wisconsin and Minnesota. But they're against the radicalism alleged to be prevalent.

Once more conventionalized academicians are tapped on the chin, this time from two sources.

"The dictionary habit," says Clifford Woody of the University of Michigan (Ann Arbor) "does not measure a student's intelligence or his scholastic aptitude or anything else."

Chimes in Dr. Floyd A. Spencer of New York University (New York): "Many Phi Beta Kappas cannot intelligently read the better magazines because their education has been so departmentalized."

Club Rooms Open at Regular Hours

Pool, Billiards, Ping Pong Played at Reasonable Hour Rates

Facilities of the men's club rooms are now open from 12 to 1:30 and 3:30 to 5:30 to men students, according to Merle M. Price, director in charge of the club rooms.

Pool, billiards, and ping pong may be played at the nominal sum of 30 cents per hour, with time given to finish the game if you are polite about it. Participants must rack up the balls themselves, however. Chalk is also furnished, and new tips are put on the cues when said cues suffer the vicissitudes of players who labor under the impression that pounding the floor helps their game.

Since chess clubs don't keep the minutes of their meetings, but the hours, no hourly charge has been made for use of the checkers and chess. Thus far, no chess player has been excited to the point of damaging the chess men, so the sets are still intact. Plenty of them to go around. Merely return them when you wake up after the game.

Various decks of cards in various stages of use and misuse will be found on the card tables. These decks are especially designed to fit either 500, auction or contract bridge, and fortune telling. Some have even been used to construct card houses to explain some silly moral. One deck was found to be stiff enough to work on the dime and card flip-it-out-from-under-finger trick.

And if all of the aforesaid games are going full tilt, the candy counter has a varied and generous supply of this and that, and the radio plays loud and long. Not to mention the deep, leather easy chairs that have taken and will continue to take, a plethora of punishment. Unlax, brother, unlax!

Rifle Club Organizes For Summer Session

The Stout Rifle club, which has been in continuous operation since it was organized in 1927, met at the Stout Armory Thursday and organized for the summer session. The club is under the direction of Paul C. Nelson and will meet on Tuesdays and Thursdays at 4 o'clock during the summer session. It is open to all student men and women and members of the students' families.

The club officers are negotiating for an outdoor range and hope to have it for the first regular meeting.

ROOF ON H. E. BUILDING UNDERGOES MANY REPAIRS

The Home Economics building is undergoing a slight repairing at the present time. New copings and caps are being placed around the whole building. It is also planned to put a new tar roof over all of the building. The gymnasium is also to under go the same repairs.

The contractors plan to have the job completed in a few weeks.

Many Projects - - -

(continued from page 1.)
printing instructor at Boys' Technical High School in Milwaukee, is doing lathe work. Vernon Nelson, Willis Giese, Robert Veiy, and Leo Styer are doing various machine shop work.

General Mechanics.
The class in general mechanics, under Mr. Kranzusch, is made up of 10 students who are really getting a varied course for many things. D. C. Snoyenbos is turning a chair. Lyle Garnett, of Milwaukee Vocational school, is building a model boat. Arthur Gaffney is working out instructional material for metal and electrical work in a heretofore single unit shop.

Matthew Gjestson is working in bench metal, plumbing, heating and electricity. Oliver Haney, of Iowa, is working in bench metal, art metal and electricity. Archie Hawkins is doing bench metal, plumbing, electricity, concrete, and art metal work.

John Mattes is studying metal work and general repair jobs. William Winger and Harold Hawkins are in art metal and bench metal. Mr. Merrill, who is a graduate of this institution, is getting some additional shop experience in copper, pewter, and strap iron.

General Metal.
Mr. Keith's class in general metal has been learning how not to blow up the school while doing oxy-acetylene welding, oxy-acetylene

cutting, forging, and working in cold metal and machine shop.

The men taking the course are Clarence Arthur Berg, Fulton E. Bell, and Cornelius A. Benson, now in the cold metal unit; Roy Gregory DuCharme, John Newton Dodd, Edward J. Paulus and Francis F. Whiting, in welding; Harvey Gordon and J. Howard Waddell, in machine shop; F. A. Steinke and Harold H. Hawkins, ornamental forging; and Arvid John Stubb, advanced welding.

Each man in the class will have a chance to go through the other units in the course during the term.
Sheet Metal.

Mr. Keith also has a class in sheet metal, composed of students doing first, second, third, and fourth year work. Those in the first group are Alonzo L. Speece, William Hepfinger, Carl J. Anderson, Oliver J. Haney, Benjamin Tapper, Alf Leonard Slette, Dale V. Walton, John Herbert Cigard, Orian Timbers, and H. Michaels.

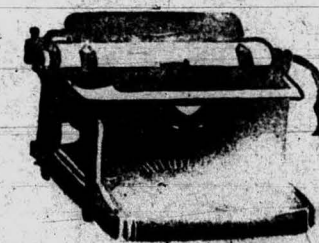

Those in the second group are Alf Leonard Slette, Fulton E. Bell, and Harley Van Valkenberg. These students are applying triangulation to construction in regular fittings.

Van Valkenberg is in the third group and is working on shop practice in production. The fourth group, composed of Harvey Gordon, Wilmer Flory, and David Thomas, is doing copper and brass work.

During the regular session the class group is made up of students on the same grade level and the subject content is more uniform. Since the demands are more varied by the cosmopolitan group that attends the summer session, the course of study must be made to meet the demands of the students.

FATHER OF HOME EC HONOR STUDENT DIES

Frank B. Joos of Alma Center, Wis., father of Miss Mable Joos, honor student of last year's sophomore class, was fatally injured when he fell from the loft in his barn and fractured his skull. Miss Joos's brother was killed when he fell off a hay load, the wagon passing over him, just a little over two years ago.

Miss Joos had just returned from the summer YWCA camp as Lake Geneva, Wis.

PRESIDENT, VISITORS, AND STUDENTS—NEWS NOTES

Miss Cordelia Moody '35 of Menomonie has taken a position on the staff of the Alma Center high school, where she will teach home economics and direct the glee club.

President Nelson left Monday for Madison where he attended a meeting of the board of directors of The Stout Institute Tuesday.

Assembly Speaker
Displays Handiwork

Industrial activities at Stout were evidently too much for Rollo Walter Brown, assembly speaker last Friday, for he brought forth photograph to prove his own handi-craft abilities.

One photograph is of his studio, but has all the appearances of an ordinary hut. The photograph was an exterior, so doesn't prove anything. The statistics of the case are, however, that he purchased part of a building at a nominal cost, and then went to work. The outcome was that he added a bit here and there, and when he had finished he had a fine studio, the total cost of which reached the sum of \$27.50.

Other proof of his handwork exists in a photograph of a well which he built and which is on the same property with the hut. He is hanging on to the rope going down into the well with apparent ease, thereby seeming to prove that he is at least familiar with it, anyway.

Non-Residents Warned
To Own Fishing License

Summer session students who are not residents of the state of Wisconsin must have a non-resident license if they wish to fish, cautions Game Warden Harold Apel of Menomonie.

Mere ownership of property does not make one a resident, and all persons 16 years old and over must have a license to fish. Residents must have a license to fish with rod and reel.

Reports have come in that several non-residents have been fishing without licenses, and as the law is very stringent and the fine heavy, Warden Apel suggests that these people have their licenses.

Licenses can be obtained in local tackle stores.

Stout Students Work
In Glacier National Park

Lawrence Braten, Elk Mound, John Ludvigson, Elk Mound, and Paul Rienhard, Eau Claire, are employed this summer driving buses in Glacier National Park in Montana. Mr. Braaten and Mr. Ludvigson were Park employees last summer and are regular session students at Stout.

Miss Marjorie Rossler '28 was married to Merle Scott at Appleton, Fla., recently.

Miss Marion Rhiel, Elmwood, Wis., who has been teaching at Mukwanago, Wis., visited her Alma Mater Thursday.

MARTHA DRESSLAR VISITS
HOME ECONOMICS SCHOOL

Miss Martha Dresslar, assistant professor of Home Economics at the University of Washington at Seattle and a recognized authority in the field of food, visited the Home Economics departments of The Stout Institute Monday. She is on her way to San Diego, Calif., to visit the Exposition, after attending the American Home Economics Association convention at Chicago last week.

Miss Dresslar is collecting old cookbooks, gathering them from the old book shops she visits on the way. Her collection already includes many valuable books, a number of which are now out of print.

Punch By The Gallon,
Pies By The Dozen

Nearly 10 gallons of punch, 300 eskimo pies, and 150 prizes in suckers, bars, and gum, were consumed by more than 200 people who attended the annual summer session party last Friday evening, according to Dr. J. M. Dawley on the committee responsible for the entertainment.

Mrs. Myrna H. Meslow, Misses Letty Walsh, Luella Wright, Violet Hassler, Dr. Boyd C. Shafer, Dean Merle M. Price, F. E. Tustison, and Miss Louise Buchanan, in charge of refreshments, were on the committee that put on the party.

Bingo, horse racing, and a shooting gallery held sway in the old band room of the gym; the men's club rooms were opened to every one; and bridge and other card games were played in the Y rooms while the main throng gathered in the gym for dancing and refreshments.

Even the music was furnished by an all Stout orchestra made up of students and alumni of Stout.

Boyd, Art Director,
Explains Advertising

M. Boyd, Chicago, Ill., art director for Lord and Thomas, advertising agency, gave an interesting talk to the members of the freehand and architectural drawing classes on Friday, June 28.

Mr. Boyd explained the makeup of the advertising firm which is the largest in the world. There are the contact men or salesmen, artists, photographers, make up force, and the directors, he said. He explained that all advertising was now on the order of photography showing things just as they are or would appear to the eye. He also stated that the need for skilled artists in the field was still very great.

Mr. Boyd was an artists himself, a free lancer in Chicago, until he accepted his present position as director for the firm of Lord and Thomas.

Miss Valeria Volp, daughter of Mr. and Mrs. Frank Volp of this city and Ronald Miller, former students of The Stout Institute, were married recently at Austin, Minn.

CHILD MANAGEMENT CLASS
STARTS REGULAR SESSIONS

According to Mrs. Huston, instructor in child management, the nursery school has begun its regular sessions. Four of the regular children are back. They are George and Peter Schneider, Barbara Schabacher, and George Fletcher.

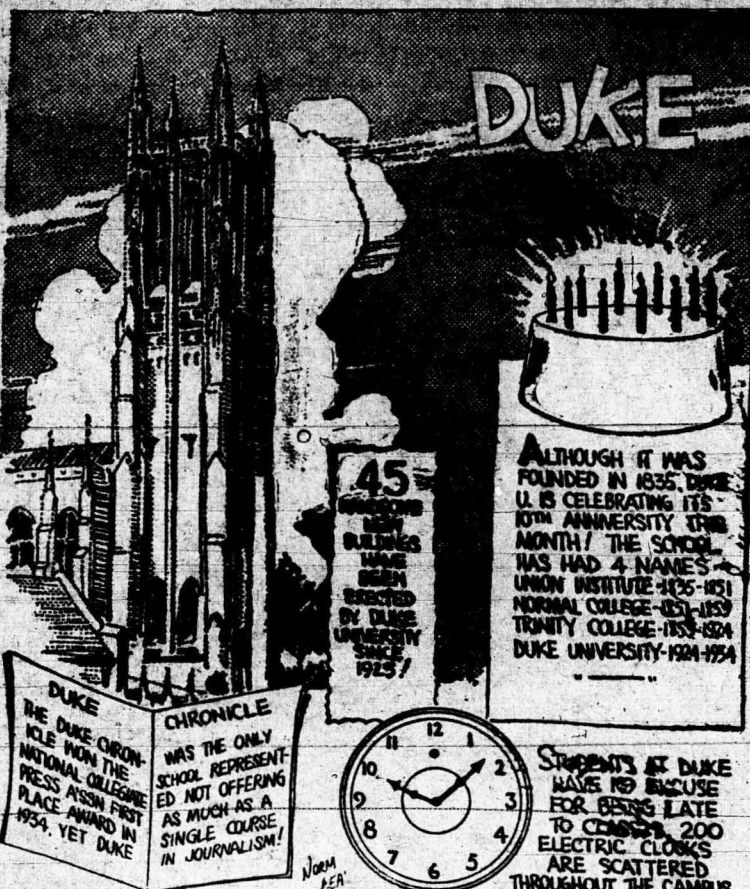

Four other children whose parents are attending the summer session are enrolled. They are Judith Boyle, Aileen Schalze, Sally Jewson, and Patsy Darling. The course is given from 8 to 12 daily. Mrs. Huston says that they have all the children that can be handled and are not enrolling any more at this time.

Miss Verrell, who has been assisting in the instruction in this department, is studying this summer at the University of Minnesota.

the past six months the Guild has averaged ten new clubs per month. It has been necessary to recently add a junior division to the Guild for the organization of the children of the Guild's membership. Current news of the Home Workshop Guild's national project contest, etc., may be found in the Popular Science Monthly Magazine which is the organization's official magazine. Our director, C. A. Bowman, has been a member of the Guild's advisory committee since its beginning.

Industrial educators everywhere are reporting the significance of leisure time activity as it applies to their profession. They have indicated that this field of work is an activity in which they, as industrial teachers, are trained to be the leaders. Good leisure activity follows the objectives of their teaching philosophy and affords an admirable contact with adult leaders in the community who are interested in their field of work.

The conferences are therefore expected to bring out many excellent ideas, plans, and programs and are considered to be an unusual opportunity for this summer school membership to get first hand information from a national leader who is an authority.

Recent changes have been made at Stout so as to keep up and possibly lead in training teachers for the home workshop movement. Room 25, which is to be used for the morning conference, is being developed to represent a typical

THREE PLAYS CHOSEN FOR
DRAMATIC PRESENTATION

The three one act plays that will be presented by the dramatic coaching class on Wednesday, July 31, of the last week of school, have been chosen by Miss Hassler of the dramatic department. "The Teapot on the Rocks," by John Kirkpatrick, an experienced theatrical producer who has filled every office from assistant stage manager to playwright, is a comedy that will be on the program. "Grandma—Old Style," a comedy by Walter Prichard Eaton, New York dramatic critic and lecturer on the theater, will also be presented. "The Opera Matinee," a social satire by Alice Gerstenberg, is the last play that has been chosen.

home workshop situation and Room 24, which is used in the afternoon, is used for development of a comprehensive General Mechanics course. An opportunity is afforded students to plan for the techniques of conducting hobby-clubs and hobby fair activities in the study of "Social Education."

The women of Stout have a class in "Craft" wherein they develop plans and projects. During the regular session, the Art and Craft club in conducted as a model hobby club.

Trade Bldg. Activities
Progressing Rapidly

The activities that are going on in the Trade Building this summer are varied and progressing rapidly. Mr. Nelson's class in Woodwork is at the present time working on roof framing. The carpenters are doing the framing by the "profile" method instead of the steel square method. Two weeks is devoted to this type of work.

In the Painting and Decorating class taught by Mr. Wigen, the students are engaged in wood finishing and matching of panels.

In the Auto Shop, Mr. Krantz plans on doing only small overhauled jobs. The class is to reline brakes and do a cylinder reboring. They are also studying the function and operation of each part of the automobile. The class does not plan to do any work in aeronautics.

R. W. Brown Sees "The New Ideal"

Makes Plea to Get a Better
Overview of
Life

"Back away from the narrow confines of life; get an overview of the way society lives" was the keynote of Rollo Walter Brown's lecture in the Stout assembly last Friday morning.

Mr. Brown gave a brief overview wherein he emphasized that the cause of society's unchristian deficiency was a perverted profit motive which has become the people's philosophy of life. "The really great things of life, however, are not done for profit," said Mr. Brown. "Mothers have never worked for profit; the great artists such as E. A. Robinson, never worked for profit."

"Some people," said Brown, "do have a spark of a real humanitarian life philosophy. This must be kept alive. Those people must keep their ideal. For those who don't have it, a subtle technique must be used to educate and guide them, to help build a solid foundation and as the movement grows, progress will be made; perhaps not so much in this generation but in those to come. Above all, we must not become too cynical or pessimistic."

In his overview of contemporary society, Mr. Brown emphasized the following observations. The radio is perverted by the undertaker who boasts Crazy Water Cryscome depersonalized; factory jobs, homes, church, community, and consumers' goods have become depersonalized. The worker is only so much energy to use and then discard the body; government has been for only the few; judicial procedure can be fixed up; munitions makers know nothing of patriotism; even education has become a factory, financed and controlled by the ruling class; good books and art are not published or sold because of no profit; and the gospel of the church can be determined by the length of the wheel base of the autos out in front."

Brown deplored the fact that people were haunted with insecurity when there is so much surplus and that profit had increased hatred and broken down good-will.

In an interview with Mr. Brown after the lecture, he spoke of his intimate acquaintances with Robert Frost and the late E. O. Robinson, who are considered this generation's greatest poets. There is a good possibility that Brown will write a book about intimate personal detail of Robinson's life.

F. C. Janisch, superintendent of schools at Alma Center, visited The Stout Institute Saturday.

EAST, WEST, NORTH, AND SOUTH MEET IN WOODWORK

In H. M. Hanson's woodworking classes are found men from California to Florida. "C. A. B." Benson (Not to be confused with "C. A. B." Bowman) is from Wright City, Mo., and Z. J. Rubeis of Bessemer, Mich., represent the north and south of the class. G. H. Welles of Miami, Fla., and Dale Walfrom of Mantica, Calif., are representatives from the far southeast and west. Russell E. Husten, Hamilton, O., and Paul Nordstrom of Oakland, Neb., vie for honors as middle men, with R. Schoenoff of Colorado representing the middle west.

Edward Reed, "Man Without A State"

Edward Reed, principal of the vocational school at Washington, D. C., has enrolled this summer at The Stout Institute. There has been some difficulty as to whether he pays tuition or not, due to the fact that he was born and has lived in the District of Columbia. He has never been allowed to vote or, as he says, "Not even elect a dog catcher."

He is not a resident of any state, as people born in Washington have no legal residence, the only residence being that which is brought in with the individual, such as congressmen, who do not lose residence in the state they represent although they do not return to renew it.

Mr. Reed has written to Washington to get a legal statement on the case as to whether he cannot claim his residence as any one state of the Union. As he sees it, he and all other taxpayers in Washington have paid taxes that have educated, tuition free, the children of all the congressmen.

Bob LaFollette, for example, was a classmate of Mr. Reed's in the

Office Secretary Was Married In Illinois

Miss Helen Staverlock, general office clerk, and Robert Miller, of Menomonie, were married recently at Richmond, Ill. They were attended by Mr. and Mrs. Ray Berger of Genoa City, Wis. Later they visited Miss Luella Meininger, instructor in the Menomonie high school at her home.

grade schools of Washington and was educated there free, though a resident of Wisconsin, and Mr. Reed says he does not see why the same courtesy should not be returned to citizens of the District of Columbia.

Another point that is of interest to industrial education men is that the Smith-Hughes law does not apply in the District of Columbia due to the fact that the law reads, "In all states and territories," and no special mention is made of the District, which would be necessary as it is not included under either of the other two categories.

Mildred Nichols '34, teaching at Randolph, is visiting in Boston at present and will return soon to direct a summer camp in Minnesota.

Here's How to Get Long Distance Calls

Long distance phone calls and special messages for students are usually relayed to the desk of Miss Santee, secretary to the president. In such event, a card with the person's name that is being called, is put on the emergency bulletin boards and asks the person to call at the president's office immediately.

These bulletin boards are placed in the industrial arts building under the main bulletin board.

"It is expedient that these boards be scrutinized at regular intervals," stated Miss Santee, "in order that these emergency calls may be handled with rapidity."

Casts Announced For Three One Act Plays

The casts as announced by Miss Hassler for the three one-act plays to be presented by the classes in dramatic coaching are as follows: "The Teapot on the Rocks" includes Betty Keith, Ruth Vigerust, Harriet Gunderson, Douglas Clausen, Fred Darling, and directed by Myrtle Swanson.

"Grandma, Old Style," includes Marie Levenhagen, Louise Kirk, Amelia Smilanich, Gladys Anderson, Fred Darling, Douglas Clausen, and will be directed by Gladys Fuhrman.

"The Opera Matinee," directed by Marie Levenhagen, will include the entire cast and in addition Mrs. Winfield Martin of Madison, who has taken part in summer session plays for the past three summers.

Five New Placements Made During Week

Five placements during the first part of the week include Dorr Snoyenbos '35, who has taken a position at Frederic, Wis., where he will teach a shop course, science, and direct vocal music. Mr. Snoyenbos will receive his degree at the end of the summer session.

Lila Storanat '34 will teach home economics in the high school in her home town, Mindoro. Marguerite Roettiger '34, of Fountain City, Minn., will teach home economics and science at Clara City, Minn. She is attending summer session this year.

Ruth Graham '34, of Roberts, has received a position to teach home economics and science at Shellsburg, Iowa, next year. Janice Henning '35, of Fountain City, will teach home economics in the Sheboygan vocational school. She is attending the 1935 summer session.

BOB WELCH VISITS U. OF MICH. BIOLOGICAL STATION

Bob Welch, instructor in vocational education, took a trip to the University of Michigan biological station at Douglas Lake, Mackinac island last week end. He traveled by boat across Lake Michigan from Manitowoc to Frankford. Mr. Welch left Wednesday night and returned to Stout Sunday evening.

Widely-known Violinist Plans To Present Varied Program

**Stops Off in Menomonie While
on Extensive Tour of
Northwest**

COUPON NO. 2 WILL ADMIT

**Will Present Special Program
Thursday Night at 8:15
in Auditorium**

Harry Farbman, well known violinist both in the United States and abroad, will appear before the summer session audience in the auditorium Thursday July 11, at 8:15 p. m., presenting a varied program of Handel, Mozart, Dvorak-Kreisler, and selections by other composers. Edith Schiller accompanies him.

Admittance to the concert will be by coupon No. 2. Tickets for those outside the school will be sold at the door for 50 cents.

High praise continues to follow Farbman's appearances before critical audiences. Musical critics everywhere have been most gracious in their recommendations of his virtuosity. As in previous years, the Farbman program will excite pleasurable anticipation. His program will include several of his old favorites and a few new items. The program appears on page 2.

More than ordinary interest attaches to the coming of Harry Farbman. To say that here is a young artist of great promise does not tell the whole story for at 27 years of age Mr. Farbman is acknowledged to be a finished performer on his chosen instrument.

GILES CONFERENCES TO BE ARRANGED

Special effort has resulted in arranging three days of conferences led by N. B. Giles, special agent for the United States office of education.

Giles will be in the school on Wednesday, Thursday, and Friday, July 10, 11, and 12 to lead formal and informal conferences in industrial education.

Conference schedules will be posted on the bulletin boards, according to Dean C. A. Bowman.

"Dog" Roast Relieves Camp Life Monotony

In addition to much resting and little studying a weinie roast instigated by Mr. and Mrs. Diehn was enjoyed Saturday evening at the Camp Colony, taking the place of the usual supper.

After the roasting, burning, and ash dusting was inflicted on the pups, they were treated with a variety of trimmings and consumed with great gusto. Ice cream cones were served for dessert.

A high spot on the program developed when balloons were passed among the children.

As the natural light began to fail, marshmallows were toasted and salaries and conditions were cussed and discussed until time to retire.

SUMMER SESSION DIRECTORY

Through The Stoutonia the directory is published. Complete on pages 3 and 4.

Dorm And Colonists Organize Ball Teams

Two summer session kittenball teams, Lynwood and Camp Colonists, have joined the recreational league of Menomonie, and had their first engagement last night at 6:15 on the Fifth Street diamond.

The members of the Lynwood team are:

James Mezzano, William Wivell, Heinrich Gaertner, Peter Christianson, Robert Ainger, William Gerken, Dan Danielson, Jack Notebaart, Stanley Rishol, Edward Reed, Charlie Romine, Alva Jones, and Gordon Wells.

The members of the Colonists' team are:

Arthur Henke, Carl Anderson, Oliver Haney, Harlan Colburn, Harold Kerr, Harvey Waffle, Oscar Dhein, Harvey Gordon, Sid Anderson, Charley Hepfinger, and Howard Olson.

Rifle Club Sets Up Range At Fairground

The rifle club has obtained an outdoor range at the fair grounds. They will be doing 50 yard small bore shooting there. The range faces east and is exceptionally well adapted to evening shooting.

The club is constantly increasing its membership and, with the outdoor facilities, will be able to accommodate any number interested in rifle practice. Regular target practice is held every Tuesday and Friday afternoon. Rifle club cars leave from in front of the Trades building at 4 p. m.

MIXER DANCE

A summer session mixer dance in the gymnasium, Friday evening, July 12, from 8:30 to 11:30 has been announced by Merle M. Price, dean of men and chairman of the mixer. Music will be furnished by a local orchestra and refreshments will be served.

Coupon ticket number 3 will admit summer session students. Members who wish to bring members of their immediate families may request guest cards at the door.

Admission for others will be 35 cents.

THE STOUTONIA

Printed and published every Tuesday and Friday during the summer session by students at The Stout Institute, Menomonie, Wisconsin

A WORD ABOUT THE ADVERTISERS

It is through the courtesy of the advertisers that The Stoutonia is managing to exist this summer. We on the staff appreciate the hearty response given to our efforts by the Menomonie mrrchants, and sincerely hope that the response from the summer session students is equally as hearty.

'One Elephant Power' Car Pulls Out Of Mud Holes With Greatest of Ease

The circus is coming to town and with it one elephant with one long and one short tusk. Billy's the name. "Billy's the nicest elephant I have ever known," says Mrs. Wied of the Stout summer session faculty.

The reason's very simple. As the story goes, Mrs. Wied was attending the Sells-Sterling circus when it was at Stevens Point and had parked her car back of a tent, the only parking spot left. When the circus was over and the Wieds were starting to return home, they had scarcely moved before they were hopelessly stuck in a mud hole back of the tent and the car sank in up to the axle.

Mrs. Wied's son had a bright idea when he piped up, "Mother, we should have an elephant to pull us out." And a very modest voice from within the tent said, "Just a minute, please," and then Billy and

his keeper came around the corner of the tent.

In the softest voice imaginable, the keeper whispered in the elephant's ear, "Take hold of the bumper," and then "Alright, lift!" And, righto, off came the bumper.

"We'll need a rope I'm afraid," the elephant's keeper said, and when he returned and hooked it on the axle and around the elephant's neck, he politely said, "Pull, Billy," and presto the car came out as if the mud hole was only a bird bath. There are mighty few people this side of the equator that can boast that they have been pulled out of a mud hole by elephant power.

Another interesting sidelight on the circus is that one of the clowns is a high school teacher. Coach Erdlitz of the Oshkosh high and vocational school has been clowning for the kids at circuses for several years and he says that it keeps him in trim for his job and he meets all kinds of interesting people. He is a physical education instructor.

The staff didn't get the usual complimentary passes for printing this story, but it wouldn't be a bad idea, Mr. Circus Manager.

Three men are needed to remove the snow from the Stout campus.

Grads Noted As Indst'l Authors

Several Instructors Noted in Manual Arts Press Exhibit.

Present and past Stout shop instructors and graduates were found to be authors of many books put on display by the Manual Arts Press of Peoria, Ill., when it exhibited in the Industrial Education and Home Economics buildings this past week.

In the book "Trade Foundations Based on Producing Industries," by R. H. Rodgers, there appear chapters by J. E. Ray, H. F. Good, and H. C. Milnes, instructors of drawing, electrical, and machine shop respectively.

Emil F. Kronquist, graduate and former metals instructor at Stout, has three books exhibited. They are "Mechanical Drawing Problems," and "Key Plates for Mechanical Drawing Problems," and "Metalcraft and Jewelry." Mr. Kronquist is at present an instructor in Washington High School, Milwaukee, Wis.

The exhibit also included two pamphlets by C. A. Bowman, director of the summer session, which deal with the learning of lettering.

In conjunction with Buxton, Fred L. Curran, student teaching supervisor, has published the book, "Paper and Cardboard Construction."

And a Menomonie woman, Beth Bailey McLean has two books exhibited, "Meal Planning and Table Service," and "Good Manners."

Kittenball Schedule Changed Next Week

Due to a change in the schedules of both Lynwood and the Colonists an unscheduled kittenball game will be played next week. This came because some games were scheduled in the recreational league for two weeks past the close of the summer session.

On Monday, July 15, the Colonists play the Centrals on the Stout lot. His game was originally scheduled for Monday, Aug. 12.

Then, on Wednesday, July 17, the Colonists play the Farmer Store on the Stout lot. This game is as per schedule.

The other game is the Lynwood game with the Farmer Store team, which will be played tonight at the Stout lot.

Colony Women Hold Weekly Cabin Party

The women's weekly party at the Camp Colony was held Tuesday evening in the cabin. Mmes. Lange, Haney, and Dodd acted as hostesses, serving light refreshments and introducing novel and clever games.

During the evening the ladies had talents in music and art. Their artistic efforts illustrated various songs. None of the masterpieces were preserved for posterity.

As for the musical talent of the group, the decision will be left to the several men who were trying to study in the adjoining room. A good time was had by all—the women.

Michaels To Speak To Homemaking Teachers

Dean Ruth E. Michaels will speak before the George-Ellzey home making instructors annual conference which is meeting in Madison, July 15 to 19.

The conference will be in charge of Miss Alma May Ganz, state supervisor of home economics education, and Miss Grace Price, itinerant teacher.

Other speakers for the week are Miss Meloche of the extension division of the University of Wisconsin, Mrs. Mortenson, state leader of home economics extension work, and Mrs. W. M. Wengner, of the Alumni Research Foundation of Madison.

IVAN MILLENBACH TAKES TEMPORARY SCOUT JOB

Ivan Millenbach of Chassell, Mich., is temporarily filling the position of regional scout executive in this region which includes 7 counties. He is filling the position of former Executive Hoffman, who has taken a similar position in another district.

Mr. Millenbach took the position at the close of the regular session. He has had experience in the work, having been scout master here in Menomonie. His office is in Chipewewa Falls.

Bowman and Brown Ponder This a Bit

"And a little child shall lead them," might well be the moral of this story.

It seems that Dean Bowman and Instructor Brown have sweated long and laboriously over what they thought to be the perfect test—it was so difficult, in their estimation, that no one could get a perfect score on it.

And on June 24 in trekked the summer session students. Among them was one recent graduate who bethought himself to take Theory and Organization of the General Shop. He had been president of the student association in his senior year, but what that has to do with the story is a bit vague.

Nevertheless, this "little child" took the test which was administered to the class on the third day and made—don't tell me—a perfect score.

All of which means that a lot of work has been shot to Tophet.

Louis, The Engineer, Dashes Blithely Out and Plays Fireman to Waste Cans

Somebody has taken that warning too seriously in regard to the use of the tall waste cans at the entrance to the two buildings. Perhaps the trouble arose when a right handed smoker flipped a butt into the left-handed can in front of the I. E. building, for Louis, the engineer, had to play fireman for a while the other day.

From the print shop window, the staff could see smoke curling from the can, but God had provided a news story, and who was the staff to refuse.

Goodie, goodie, fire had begun to lick its way up the sides of the can. Hooray! Now they were

jumping out the top of the can and peeling the paint off the flap.

Somebody should surely come and rescue this bit of rustic furniture, and somebody did, for Louis did the honors, and killed what might have been a mighty noble news story.

He might have dashed out with a fire hose and staggered around with his arms shielding his eyes from the smoke; but he just stood there and dampened the fire with a sprinkling can. Just another example of the unimaginative soul of the worshipper of the dynamo, or if you will, the generator. Nuts to the machine age!

V. J. Hydar Leads Social Discussion

Is Personnel Manager of Falk Corp, Milwaukee; Arrives Here Tuesday

Social conferences led by V. J. Hydar, personnel manager of the Falk corporation, Milwaukee, will headline the visiting speakers next week when he arrives Tuesday, July 16.

These conferences will be held in the Stout auditorium at 8:30, 9:30, and 1:30. The classes in the social science group will be designated as those to attend. Others may attend if they so desire.

The questions for discussion will be issued on mimeographed lists at the conferences. These questions have been worked out by the students in the social science class. The questions will be numbered. The order in which they will be considered will be the order in which they are called for at the conferences.

This type of conference is being used after many requests to continue its use by persons who have participated in the past in conferences.

Charles Rowe, Last Year S.S.A. President Placed

Included in placements made in the last two days is that of last year's SSA president, Charles Rowe '35, Beloit, who has been given a job in the Bloom Township high school in Chicago Heights. He will teach machine shop, and assist in football coaching. This high school is a new one just completed, which cost a million dollars. It has a student body of over 1,800 and a faculty of 75.

Verna Damn '35, Columbus, Wis., received a position as instructor in home economics in the Waupaca high school.

Rosamond Carlson '35, of Eau Claire, will teach next year in the home economics department at Stanley, Wis.

Alice Beedon '33, Park Falls, has been chosen to teach home economics and music at Muscoda, Wis.

Lester Puhl '35, of Menomonie, has been selected to teach at the new North Junior High school in Knoxville, Tenn.

IS IT HOT ENOUGH FOR YOU?

The classic phrase these torrid July days in "Is it hot enough for you?" So far as we have been able to learn no one has been able to find a satisfactory answer to that question. We are beginning to suspect that it belongs in the category of questions to which no answer is expected, most reliable of which is "How do you do?" But "Is it hot enough for you?" has much more value. It is much better for starting an acquaintance since it involves somehow the secret springs of sympathy for fellow suffering and a sharing with him a universal though not quite expressed condemnation of something. Two more powerful binding forces cannot be found.

The question is usually accompanied by a doleful shake of the head, if the questioner is a pessimist by nature or if he is annoyed by his sticky clothing or hot feet. The doleful shake and the expression that goes with it say very plainly, "Something ought to be done about it; here I've paid my taxes and . . . and . . ." On the other hand if the question is sung out by an optimist, or someone on the way to a good swim, or one of these fortunate beings who seem not to suffer from the heat themselves and to enjoy the damp miseries of others, the question seems to carry with it a wish that we might get some real weather, say ten or twenty degrees hotter.

Now our own feeling on the matter is that we should like to soak in a lake somewhere, everyone who fires that question at us when we are gasping through the afternoon of a humid July day in summer school. Our restraint will surely break if someday one of our instructors, as a prelude to a very dull class and an hour of shifting about to keep from sticking too solidly to a hard chair, comes in with a blythe and gloating, "Is this hot enough for you?" We will no longer glare. We will no longer mutter an inconsequential "Pretty hot, all right." We will rise up in our primitive fury and commit some nameless deed of violence. And we will not regret it. No not even when they turn the current on and some wit asks—if they allow wits in the death chamber—"Is it hot enough for you?"

Many Favor Late Summer School Date

To judge from the transportation and 1936 summer session questionnaire filled out by registering students on registration day, the opening day this year was highly satisfactory.

The latest preference given, that of June 22 for the opening date of the 1936 summer session, was voted as the most desirable, carrying 226 votes, as against 166 for June 15, and 28 for June 8.

The majority of the summer session students traveled to Menomonie by car, for 226 indicated their transportation as such. Twenty-seven came on the bus, and 20 on the train.

Only two men indicated a preference for the 9-Weeks summer session while one man preferred that the 1936 summer session open on June 29.

It Seems That Instructors Will Go To Any Length to Hold Interest

Salmon sandwiches with lettuce and pop in six flavors was featured as the stimulant to revive the faint and weary students of Dr. J. Erle Grinnell's novel course after they had spent an hour of misery and brain racking on a test of who wrote which and when and what of it.

It was a Dutch treat affair and planned in anticipation of the exam. Although the test showed their ignorance of the novel, their forethought in planning lunch displays some intelligence.

The picnic took place on the fourth floor of the Home Economics building in the regular English chamber of torture at 11:30 Thursday morning.

That same morning the class in contemporary civilization led by Dr. Boyd Shafer adjourned to the Peerless Grill where they held a round table discussion of civilization in general over the coffee cups. It was breakfast to most of them as

the class is one of those well-known 7:30 classes that always causes naturally sleepy people to miss breakfast. Although this idea is quite new and not universally accepted by all the members of the faculty, we are sure that it would be received with great enthusiasm by all late arrivers at 7:30's.

This is just an idea, but it might be suggested that those fortunate instructors that have no 7:30 classes furnish ice cold lemonade for the students during their lectures. Is there a second to this suggestion?

"Don't be absurd—of course it's easy to keep sports clothes looking just so all the time. Simply phone 22 and that's that! Aside from doing marvelous cleaning, there's the security of knowing everything is insured while in their possession!" Our \$12,000 worth of new equipment means PROMPTNESS, too.

Conference Class Opening Monday

Theodore Roswell of Fond du Lac Vocational School Is in Charge

Designed to aid teachers in all phases of education, the class in conference methods led by Theodore Roswell of the Fond du Lac vocational school, will open Monday, July 15, for the remainder of the summer session.

Mr. Roswell has been teaching by the conference method among sales people in Fond du Lac vocational school for the past few years, and has much personal experience that will aid him in presenting such a course.

"The conference method is recognized as one of the leading devices in conducting classes where the group has many common experiences," states Mr. Roswell. "These experiences may be gained from working at the same trade or occupation, from field trips or assigned reading material."

Adult education is especially well handled by the conference, according to Mr. Roswell, but can be adapted to any other use desirable.

"It is valuable to any classroom teacher, not to take the place of other recognized methods, but rather a device to supplement them when the occasion arises," he explained.

"One of the features of this course is the study of techniques to use in order to conduct a meeting in an orderly manner and to keep the discussion on the topic under discussion."

The course is a two-credit course and meets from 8:30 to 9:20 and from 2:30 to 3:20 each day in the basement of the Home Ec building. Enrollments will still be accepted, according to Mr. Roswell.

Often four men are needed to remove snow from the Stout campus.

Labor Problems Class Study Their Salaries

Dr. Boyd C. Shafer's labor problems class, which has been studying wages, and how they measure up to the health and decency standards of living, took stock anonymously of how the incomes of the various members of the class measured up to the standards.

They hit a snag at the first corner for they could not remember where the money had gone until they could see their wives (the head of the house?).

From the statements that some gave they spent more than they had earned which was just as discomforting as not knowing where it had all gone.

In this study of the various problems of labor, as unemployment,

Phi U Fraternity Frolics at Party

Twenty-eight Phi U Members Picnic Above Hofland's Mill

Members of the Tau chapter of Phi Upsilon Omicron, national honorary home economics fraternity, both graduate and undergraduate, enjoyed a get-together picnic last night on Wilson's Creek above Hofland's mill.

Four charter members were present at the picnic which was planned by the members that are attending the summer session. At the picnic, the 1936 convale of the fraternity which will be held in June and which the Tau chapter of Stout and the Mu chapter of the University of Wisconsin will act as joint hostesses, was discussed.

The picnic lunch included potato salad, liver sausage, boiled ham, rolls, olives, minced ham, tomatoes, lemonade, preserves, huge pieces of watermelon, and cupcakes.

And in true picnic style even with that menu there was something missing for the salt had been forgotten and Mary Finney and Belinda Hendrickson hiked back to the mill to get some.

Those members who attended the picnic but who are not attending summer school are:

Mary Louise Nibbe, Helen Diedrich, Marlys Richert, Doris Bradley Jane Green, Dorothy Cain, Marion Rhiel, Agnes Mullen, Ragna Mullen, Emily Anderson, Mrs. J. E. Ray, Jean Amidon, Ruth Howison, Belinda Hendrickson, Esther Hendrickson.

Those who are attending school and who were at the picnic are:

Marguerite Roettiger, Marion J. Kraker, Miss Walsh, Miss Michaels, Gladys Schmidt, Janice Henning, Rose Forno, Mrs. Houston, Miss Cruise, Mrs. Meslow, Miss Wright, Mary Finney, and Betty Christopherson.

U. of M. VISITORS

William Boss, chief of division of the department of agriculture, University Farm, St. Paul, Minn., and 30 members of his department, including students, visited Stout last Thursday.

FACULTY LUNCHEON

The home economics faculty entertained all the women of the summer session, Friday afternoon, on the lawn of the Home Management house.

WAYZGOOSE!

A "wayzgoose" is in the offing.

In fact, the printers are making plans now for one and will meet to discuss further details of the thing at Picnic Point tonight at 5 o'clock. Twenty-five printers have signed up to attend. "Doc" Hawkes is in charge of the discussion.

Home Economics Grads Organize New Group

Graduate women of the school of home economics of The Stout Institute formulated a plan for a graduate women's club Wednesday evening.

Henrietta Quilling of Menomonie, who is on the staff of the Fort Atkinson high school, is chairman of the group; and Vera MacArthur of Milwaukee is secretary.

The group plans to get together informally during the summer session, both for good times and for informal discussions. They hope to have with them at the various meetings members of the Stout faculty and also visiting members of faculties of other institutions.

LOIS INA BUNKER COMES FROM PORTO RICO TO STOUT

Probably the honor of traveling the longest distance to attend the summer session at The Stout Institute goes to Miss Lois Ina Bunker, who will attend here the last three weeks. Miss Bunker is teaching in the vocational school in Fajardo, Porto Rico and has not been back since her graduation five years ago.

Mabel Otteson, director of vocational home economics in the Eau Claire schools has enrolled for the three weeks courses of the summer session.

Wilbur Engebretson With Highway Dept.

Wilbur Engebretson, Stanley, early in June accepted a position as draftsman with the Wisconsin Highway Commission located at Superior. Mr. Engebretson has a degree in engineering from the University of Illinois and would have received his B. S. at the close of the summer session.

Lucile McLaughlin '35, of Eau Claire, will teach next year in the English department at Rice Lake. Her B. A. from the University of Wisconsin.

Cafeteria Patronage Increase Is Tremendous

The Stout cafeteria has been doing a good business, in fact more than ever before. Four hundred and ten people were served on Tuesday of this week, and the average day is from 350 to 400 patrons. During the regular session the average number of people served is from 200 to 250 per day, but this summer the increase has been almost double.

There has been very little enlargement of staff in the cafeteria, and with the great increase of work this summer the staff was the first to notice the increase in patronage.

Lillian Carson Reveals Much When Interviewed

by Rosie Carlson

Lillian Carson, instructor of related art, says she hails from Newcastle in the good old state of Indiana; and received both of her degrees, bachelor and masters, from the University of Chicago.

She thinks one of the most outstanding things during her college career was to help manage a marionette show.

All people have some type of a hobby, and Miss Carson's happens to be her friends. She also is much interested in travel and her four-year old niece, Luella; but her latest interest is housing, from the social and economic sides. Part of her past vacation was spent in investigation of two slum clearance projects in Chicago and one in Indianapolis.

She was asked if she ever anticipated writing a book.

"When I get time. And it will be on the economics of house furnishing," was the reply.

"It's so nice to have former students back to summer school and it draws other students back to see their friends," was the answer when asked to give her impression of the present summer session.

Dormitory Kittenball Schedule Reorganized

The completely revised kittenball schedule for Lynwood is presented below:

Friday, July 19—Central at Stout lot.

Sunday, July 21—Vikings at North Menomonie.

Monday, July 22—St. Paul at Stout lot.

Wakanda Is Scene of Summer Picnic

Party Starts at 3:30 in Afternoon; Ticket Number 4 Will Admit

The annual summer session picnic will be held at Wakanda Park, according to Dean Bowman, director of the summer session. Coupon Number 4 will be exchanged for supper tickets. And keep the stub!

Games, contests, and water sports will be provided for the entertainment of one and all. Supper will be served at the picnic grounds. Holders of coupon tickets may secure guest cards at the picnic grounds for immediate members of their families.

Guest cards are exchangeable for supper tickets. Supper tickets for others may be purchased at the picnic grounds at 35 cents each.

Wakanda Park is on the north shore of Lake Menomine. Highway 12, followed west, leads to the high way through North Menomonie. The second highway to the right is the marked road to Wakanda Park.

Faculty and students cooperate in the preparation for the picnic. Further information will appear in Friday's issue of The Stoutonia or will be posted on the bulletin board.

The use of the pavilion has been secured in case of a rain so there is no need to stay away on that account Friday.

Tea Room Serves At Regularly Set Dates

The Stout tea room opened Thursday noon at 11:45. It will be open one noon and one evening for dinner each week for the rest of the summer session. Reservations may be made by calling 415 or signing the reservation list posted in the main corridor of the Home Economics building.

Students, faculty members and their friends are invited. Luncheon is 35 cents per person and dinner is 50 cents. The first dinner will be served next Tuesday evening.

The class in institutional foods is operating the tea room this summer. Edith Swan is first manager for this summer. The duties in the tea room rotate, giving each student experience as manager, cook, baker, salad maker, and head waiter.

"TWO-FACED"

LAISSEZ-FAIRE POLICY

(Excerpts from Walter Lippmann's Phi Beta Kappa
oration at Harvard, June 21.)

The articulate belief of the industrial and financial leaders of America is the doctrine of laissez-faire. Though they recognize that government has certain duties to perform, that it must defend the frontiers against aggression and domestic peace against violence, that it must provide social services, such as education, that it must regulate many abuses, they hold that it has no function to perform in governing the national economy as a whole either to maintain it in a working equilibrium or to see to it that its products are well distributed. They insist that the vital balance is automatically self-regulating and that deliberate policy in regard to it is meddlesome, expensive, and subversive.

On the major issues of the modern world they believe in an ideal of masterly inactivity. This is the ideal they would have the schools and colleges profess. To the young men asking how they can serve their country—how they can mitigate booms and depressions, maintain a healthy relation between agriculture and industry, conserve and develop the natural resources, prevent the congestion of population and the concentration of wealth and power, the orthodox answer must be that these matters are not the concern of the state and that the only sound policy is to have no policy.

Tradition Has History

It is perfectly true that this tradition has an honorable history. It has served the country well for more than a hundred years. How is it, then, that this conception of the commonwealth has lost its authority? It has lost it, I believe, because those who preach this gospel do not practice it. It is no longer the rule of their own conduct. They argue zealously that the economy is automatically self-regulating—that free play of supply and demand will regulate the production and distribution of wealth more efficiently than conscious and concerted management and administration. But they do not in fact apply this principle. Those who are most insistent upon the ideal of laissez-faire are the very men who by means of tariffs and combinations have organized the industrial life of the country into corporate systems subject to highly centralized control. In their articulate thinking they are free traders. In their actual practice they suspend the free play of supply and demand and substitute for it, whenever it is practicable to do so, the conscious management of production and the administrative determination of prices and wages.

Katherine Spence Teaches Home Ec. To Boys And - How They Like It!

This is the first of a series of interviews with interesting people on the campus. Perhaps you have made your mark. If so, prepare yourself for an interview. You may have something that would be appreciated by many in the summer session.—Editor.

by Thea Jeatran

Katherine Spence, head of the department of home economics in the Appleton (Wis.) senior high school, teaches one of the very few classes of home economics that has only boys enrolled.

About nine years ago, when she was first teaching home economics to girls only in that school, several of the boys requested that they be allowed to take the course along with the girls.

This method of a co-educational home economics course was followed for one year and proved not altogether satisfactory as the course could not meet the requirements of both sexes at the same time. They were then separated into different classes and the enrollment in the boys class was large.

The course does not follow the old type home economics cooking idea for it includes instruction in what clothes to wear and how to buy quality clothing.

A study is also made of family relationship. Some time is spent in nutrition which is especially valuable to the athletes in the class, of which there are many.

Manners are of most interest to the seniors in the courses who intend to attend a college the next year.

There is no regular course of study followed instead the course is molded each semester to meet the changing needs of the students and a semester problem on anything from aviation to serving a dinner is turned in on completing

the course. This topic acts as a means of finding the students' interest.

It has stimulated some students who were failures in all other lines to find their vocation through this one topic.

Miss Spence says that there are no sissies or pansies allowed in the classes; only lively active students and as the enrollment always exceeds the capacity of the classroom there is opportunity for elimination.

She says that she has often left school to go down town and assist in the choosing of a suit for graduation. These same boys who are taking the course are the first string athletes of the school who realize the value of knowing what food will be best for them just before a game and what things should not be eaten or if eaten how prepared.

Miss Spence remarks that the boys are better in nutrition than most of the girls being more accurate in measurements and conscientious in neatness and cleanliness.

The reason she gives for the superiority of the boys is that they are always afraid of the girls surpassing them and they intend to excel in everything they attempt.

Miss Spence exchanges lectures with the drafting instructor giving instruction in the arrangement of the kitchen and its location in relation to the other rooms of the house to the student of architectural drawing before they make any house plans.

"I have discovered," says Miss Spence, "that the boys are more alert and alive in correlating the information they gather to their daily lives than girls and they show an eagerness in discussing the problems that come up in the course that is surprising."

Traveling, Not Writing, Is Letty Walsh's Hobby

by Rosie Carlson

When Miss Letty Walsh, instructor in home economics education, was asked how she and Fred the janitor were getting on, she just gave a smile and said, "He tells me some of the tasks I ask him to do just can't be done—but the next time I turn around he's busy at them"

"Travel—anywhere, any kind, is my hobby," she tells us; and when approached about the matter of writing a book she laughed and said, "I've had enough to do with the work on the course of study the past year so it will be some time before I'm in the frame of mind to write a book."

"I think we have the jolliest and nicest group of people here this summer," she concluded. "I especially enjoyed my consumer education class group."

Lynwood Team Wins Two Kittenball Games

Lynwood's kittenball team is going places in the city recreational league, under the able piloting of Jack Notebaart and Heinrich Gaertner. They have thus far won all their games, and have met up with some of their toughest opponents. They still have a few tough ones to encounter, however.

Friday night they played the Farmer Store team, and finally came out victorious, 5 to 6, in the eighth inning. Wivell and Gaertner were the batteries for Lynwood.

Then Sunday morning North Menomonie was crushed to the tune of 11 to 3 at North Menomonie. Again Wivell and Gaertner were the batteries.

LEON GETS APPOINTMENT TO WEST TEXAS STATE

Leon Lassers, speech instructor who substituted for Miss Hassler this past year during her leave of absence, has obtained a position in the speech department of West Texas State Teachers' college, Canyon, Texas, according to information received from Dr. Grinnell, director of liberal arts. At present Mr. and Mrs. Lassers are living in Chicago.

NEWS BRIEFS ABOUT STOUT GRADUATES AND STUDENTS

Dorothy Boody, Hudson; Jean Amidon, Minneapolis, county case worker in northern Minnesota; and Ruth Graham, of Roberts, visited their Alma Mater Monday.

Nellie Grieger and Adolph Yoder were married in the "Little Brown Church in the Vale" near Nashua, Iowa, in June. There were ten other couples married at the same time. Mrs. Yoder, Withie, Wis., is a former student of The Stout Institute and has been a teacher at the state school at Delavan, Wis.

Lois Ina Bunker, who received her B. S. degree in 1930 and has

been teaching Caguas, Porto Rico, has enrolled for the short courses that begin Monday.

Grace Quarters '32, who teaches in Duluth, Minn., visited Menomonie and Stout over the weekend.

Lucile Webb '28, of Waukegan, who is an instructor in the high school there, visited Thursday at Stout.

John Notham '30, of Arkansaw, Wis., who has been teaching in Honolulu for the past five years, is visiting here this week.

Ray Burgett '34, who is taking his Master's degree work at Ames, Iowa, this year, visited Stout this week.

Counseling Class Ends Successfully

Students Prepare Topics and Special Projects for Own Courses

Counseling on the secondary school level, a course taught by Mrs. Katherine Wied, Denfield high school dean, Duluth, where she has charge of, personnel and guidance work, will close Friday of this week.

The class included 20 graduate students each of whom have completed a special project. Russell Browe of Oklahoma City has developed a personal record system for his school which is a detailed system of case studies.

Olive Cook of La Crosse has completed a social hygiene project and has read extensively in that line. Frank Jewson, Superior coordinator wrote a paper on the social and economic trends with the view of meeting adult education which will handle such subjects as the cooperative housing, rehabilitation, leisure time education and the like. Roman Tomkiewicz of Milwaukee worked on the same topic.

Janet Johnson, city superintendent in Eau Claire, worked out a method of giving publicity over the radio to worthwhile activities in her school. Stanley Raddatz of Mt. Berry school, Georgia, made a plan to meet his own particular situation of his students who return to their rural homes and do not keep up with their school. His plan will act as a follow up course. Henry

Schulze of LaPorte, Ind., made a plan for his situation also.

Herbert Ritzman of Superior worked out a plan for use in the vocational setup in guidance for the adolescent by means of a series of case studies.

E. F. Lange, Faribault, Minn., made an analysis of moving pictures in its relation to education with problems involved and suggested means of meeting them by using the PTA and class room teacher. Henrietta Quilling, who teaches at Fort Atkinson, has developed a course in counseling using her chemistry and biology class as "the Bridge to Culture."

Mrs. Wied says that in her class were "Educators, men and women that are outstanding and well informed and that have an understanding of the social and economic situation as it effects education and the individual."

Vol. XXV — No. 6.

THE STOUT INSTITUTE, MENOMONIE, WISCONSIN

Friday, July 19, 1935

Jorgenson Leads Discussion Group

Arrives Monday to Conduct Social Science Classes During Sessions.

Chris Jorgenson, instructor for the Wisconsin program of Workers' Education, will be at The Stout Institute Monday, July 22, to continue the summer session conference program. He will confer with the social science classes, although any others interested may attend the conferences.

Three of these conferences will be held in the auditorium at 8:30, 10:30, and at 1:30. The questions discussed will be those which have been developed in the classes of the social science groups.

Formerly, Henry Ohl, president of the Wisconsin State Federation of Labor, and Henry Rutz, state supervisor of Workers' Education for Wisconsin, have participated at this point in the summer conference schedule.

Mr. Rutz has recently been appointed as regional supervisor in the Emergency Education program and has left for Washington.

Since Mr. Jorgenson has worked with Mr. Rutz during the past winter, Mr. Jorgenson has been engaged. Mr. Jorgenson has had a wide range of experience in this field of work.

Miss Randall Gives Personal Interview

by Rosie Carlson

"My whole reaction to the Stout student body during the regular session and summer school is that they are unusually fine," says Miss Leaffa L. Randall, instructor in related arts.

Miss Randall's first name is of Indian origin and means "deep water." After summer school she expects to go to her home in Wilmette, Ill.

Her Alma Maters consist of Columbia U, U of Chicago, Chicago Art Institute, and the Academy of Fine Arts in Evanston.

Before coming to Stout last fall, she was a designer for the past seven years with Marshall, Field & Co. of Chicago.

"My special interest is living more beautifully, and, believe it or not, I have a hobby of cream and peaches. I am writing a book now which will be titled, "Historic Art for Use in Social Science Courses."

PICNIC!

Plenty of food and plenty of fun will be the order of the day at the summer session picnic this afternoon. Miss Lusby, in charge of the food, says there will be no shortage of food, nor will there be any waiting in line.

The dormitory team is scheduled to play a kittenball game with the Stout All-Stars at 4 p. m., with Earl Burbridge as umpire.

Ticket number 4 will exchange for a supper ticket. Others must pay 35 cents.

PILLSBURY DEMONSTRATION WILL BE HERE JULY 23

"Our Triumph for Good Cooks" is the title of a demonstration which Miss Jean M. Rack, director of the home economics department of the Pillsbury Flour company will give to the food demonstration class, Tuesday, July 23.

The demonstration will be given at 2 o'clock in Room 304 off the Home Economics building. All home economics students and friends are invited to attend this demonstration.

Printers Discuss This And That At Wayzgoose And Even Elect Officers

Believe it or not, but the printers finally got through the business of the day conducted at their wayzgoose, and came out with an entirely new staff of officers.

Orland Paciotti, Beaver Dam, was unanimously elected president of the SPTA, which was merely a showing of the esteem with which they hold Mr. Paciotti's ability. Another reason for his unanimous selection was the fact that nobody could get in another nomination before one of Pash's friends closed the nominations.

Paciotti replaces Steam-Roller Candidate "Doc" Hawkes of Madison.

Raymond Sturm from West Allis was triumphant in the heated race for vice president, the race seeming to be more concerned with the consumption of hot dogs and pop than the election.

And then Roy De Roo of Milwaukee was shoved bodily and solely into the secretary-treasurer job of the outfit. He will henceforth be known as the miracle man of the group.

Charles Romine opened his trap as usual during this heat, and al-

FERA Teachers Hold Institute At Stout Monday, August 12

Lynwood Has Perfect Record in City League

Below are given the team standings in the city recreational league, of which Clarence Berg is the director. A change in the schedule has been announced by Berg in the Lynwood schedule. Lynwood was to have played the Vikings on Sunday morning, July 21, but this game has been changed to Tuesday, July 23, at the Stout lot.

The team standings:

Lynwood	3	0	1.000
Vikings	2	0	1.000
Farmer Store	2	1	.666
Millers	1	1	.500
St. Paul	1	2	.333
Central	1	2	.333
Colony	1	3	.125
Merchants	0	2	.000

This standing was correct up to Thursday afternoon at 5 o'clock.

Two Week Session In Industrial Arts and Home Economics.

CHARGE OF STATE BOARD

Expect 400 Instructors to Use Dormitories and Cafeteria.

Stout Institute will have an institute for FERA instructors of Wisconsin for two weeks beginning August 12, according to a dispatch in the Eau Claire Leader last Wednesday. The work will be under the direct supervision of the State Board of Vocational Education.

Plans for the institute were completed when a committee from the board composed of Greiber and Gibson conferred with President Nelson Tuesday morning. Three of these institutes will be held in the state during the summer. Madison, Appleton, and Menomonie were the cities chosen.

Instruction in all lines of work that the FERA have been doing will be given by experts from the state department. They will take over the nursery school and have classes of interest to those doing that type of work in communities.

Gracie And Snoyenbos To Sing At Rochester

Mr. and Mrs. Harold Cooke of Rochester, Minn., visited Stout Wednesday. Mr. Cooke is instructor of music here at Stout during the regular session. He is directing the Rochester city band this summer and has had crowds as large as 10,000 people attend his concerts. While here he made arrangements to have Dorr Snoyenbos and Edgar Gracie sing at one of his concerts.

CONGRATULATIONS!

ACULTY and students of The Stout Institute unite in wishing Dean Clyde A. Bowman the best wishes of the day, for on Thursday, July 18, he passed another milestone of a life devoted to industrial education.

"TWO-FACED" LAISSEZ-FAIRE POLICY

(Excerpts from Walter Lippmann's Phi Beta Kappa oration at Harvard, June 21.)
(Continued from Tuesday, July 16.)

The doctrine of laissez-faire is open to the devastating criticism that it is preached by men who wish other men to practice it. From such logical, moral, and practical confusion it is impossible to derive a noble tradition which will engage the enthusiasm of young men. They have perceived the humiliating paradoxes of our time. They have seen the glut of food while there is hunger in the land, homeless men and untenanted houses, idle men, and unused machinery and stagnant money and desperate debtors, and when they ask those who speak with authority: What shall we do? they are told that in substance there is nothing to do. These things are beyond human control and the only wisdom is resignation. They are not even told to go West and start a new life. They are told to sit and wait, like Chinese coolies in a famine, until, for some mysterious reason, the warm blood of confidence rises once more in the veins of bank directors and corporation executives.

Not Inspiring

This is not a doctrine to inspire young men, especially American young men, the sons of pioneers and of immigrants and of those who dared to undertake great enterprises and to settle a continent. If you wish to know why the young men are tempted by Communism, by Fascism, by almost anything which is emphatic and bold and positive, this is the reason: those who sit in the seats of authority are preaching a gospel of frustration. If you wish to know why in spite of all our schools and colleges, the level of competence in public life is low, this is the reason: we are not training men to govern: we are teaching them to believe that in great matters it is unnecessary to govern. If you wish to know why the political sciences are not a true discipline for the future guardians of our civilization, but are a haphazard collection of disconnected specialties, this is the reason: it is disreputable to hold and to declare a positive and coherent conception of the function of the state in a modern economy.

Working Economy Is Basic Question

The basic question is not whether we should have state socialism, regimentation, inflation or a flexible and competitive economy. It is whether we can have any coherent and working economy by having no conscious policy, allowing those who are strong to escape automatism in their own efforts and to subject others to its intensified consequences. The truth is that in the modern state even a policy of laissez-faire would have to be deliberately administered, the free play of supply and demand would have to be deliberately maintained. This would be my own deepest preference. I would rather have economic liberty than centralized direction and command. But if we are to have economic liberty we must accept the ancient truth that liberty is not the natural state of man, but the achievement of an organized society. Liberty is a right which only vigilant and wise government can provide.

Library Has Fans Thank Mrs. Brown

All evening library goers owe to Mrs. Brown, caretaker of the Home Economics building, a rising vote of thanks. While The Stoutonia editors sit in temperatures of 108 in the office tonight, the library is inhabitable, if not cool, and all due to the thoughtfulness of Mrs. Brown.

Thursday morning, a faculty member suggested that student opinion should be roused to the need of fans in the library in the evenings and a story to that effect was idly written.

Truthfully, it was with no hope of any success in the endeavor. But Mrs. Brown did no idle talking but took things into her own hands.

When she saw that it was 101 in

the shade of a fern by the window, in the library, she stayed overtime and gathered all the fans in the building, carrying the heavy ones the farthest.

There were seven fans in all, and calling in the assistance of an engineer who was only glad to leave the 114 degrees of the engine room to assist in wiring them up by means of extension cords.

It only goes to show that actions speak louder than words. For in less than 25 minutes the temperature had gone down to the cool degree of 87 and the gentle hum of seven oscillating fans promised it would stay there.

"Jazzman" Pierson And The Boys Report A Glorious Trip To Europe

Ted "Jazzman" Pierson and his band are doing a very good piece of work as The Stout Institute orchestra playing aboard the Cunard White Star Liner "Samaria," according to a letter received by Dean Bowman from Miss Kate Scritsmier, who was instrumental in obtaining the trip for the boys and who is traveling with them.

The boys, Ted Pierson, Ralph Betterly, John Barber, Bud Michels, and Fred Curran, all of whom are either going or have gone to Stout, arrived in New York on Saturday, July 13. They were 24 hours late in arriving, however, for they had to cross flooded areas in their car and had to proceed with caution.

Many times they had to get out of their car and walk along aside the trailer to keep it from tipping over as the water currents were so strong. Nothing serious happened, however, and the fellows were ready to get to work immediately.

The boys had to play three hours while the boat was loading at the Cunard dock. Thousands heard them, according to Miss Scritsmier's letter. That evening the band gave a concert in the ship's lounge, and many people commented on the splendid performance they gave.

Miss Scritsmier has hopes of obtaining orchestra work for the boys in London for a few weeks. They are to return from Southampton on Aug. 9.

Stout Of Future Will Be Exhibited

Model Campus Layout on Display in Home Economics Building.

The model layout of the future Stout campus will be put on display in the Home Economics building corridor sometime the first of next week, according to notice received today from the Stout Teachers association.

The association has taken as one of its projects for next year the pushing of the legislation necessary to give Stout a campus, and with this in mind has had the model made.

J. E. Ray's architectural drawing classes participated in the construction of the model and has done the entire job to scale. Walks have been laid out, and the entire grounds landscaped.

Graduates will be interested in this as the lack of a campus is lamented by many. The layout is purely tentative, as will be seen by the location of the field house on the model.

A coed at Woodbury College (Los Angeles) who has the use of only one hand is two weeks ahead of her classmates in a typewriting class.

Many Served At All-School Picnic

Number Served in Excess of Those Expected to Attend

That the summer session picnic at Wakanda last Friday was a success can be proved by the amount of food consumed.

About 300 persons were expected, and 350 were provided for; 370 people were served, and probably more than 400 were present. Only 285 attended the picnic last summer. Those statistics are enough to unnerve one a bit.

But to the amount of food consumed:

Potato salad was prepared for 350 servings. This gigantic salad contained 200 pounds of potatoes, 12 bunches of celery, 72 eggs, 3 gallons of salad dressing, and 1 gallon of sweet relish.

Forty dozen buttered rolls were consumed, along with 100 pounds of baked ham. To assist the ham, 150 servings of tuna fish salad were prepared. And to add that extra touch, 3 gallons of pickles and olives were handed out.

But something was needed to assist the rest of the food, so 10 gallons of coffee and 200 bottles of milk were put in easy reach of the picnickers. Six quarts of cream were used in the coffee, and 5 pounds of cube sugar were used.

To top off the entire meal, 350 packages of either vanilla or malted milk ice cream and 394 pieces of chocolate cake were consumed.

And so many summer session students and "immediate families" showed up that those who helped in the preparation of this repast went hungry.

F. E. COMPTON EXHIBITS ILLUSTRATED MATERIAL

The F. E. Compton company of Chicago is exhibiting Compton's pictured unit teaching material and Compton's pictured encyclopedia this week. W. E. Young, the company's representative, will have his exhibit set up in the Industrial Education building until Wednesday of this week and in the Home Economics building until Friday.

GRADE REPORTS

If a report of grades made on summer school work is wanted by students in attendance, a self-addressed envelope should be left in the box outside the office of the registrar.

Class in Traffic and Transportation Is William C. Bagley's Contribution

Wm. C. Bagley (at flat top desk) and his class.

Teaching the only class of its kind in existence—that is the distinction that belongs to William C. Bagley from the Racine Vocational school and living at the camp colony, for his unique class is that of Traffic and Transportation. In other words, he teaches everything in railroading from punching a ticket to auditing.

Bagley started his railroading course four years ago in 1931. He had a long table with telegraph sets and a chain that dragged trains along, and a mess of time tables, and piles and piles of railroad forms. At that time an old industrial building was being used and the space was inadequate.

Then the Racine vocational school moved into a new building, and Bagley had his chance. Now the entire road is electrified, is 60 feet long, has four engines, has cross-overs, sidings, switches, signals, and what nots. The stations are in the same order as that of the North Western line from Chicago to Escanaba, with the exception that they are 36 inches apart.

Regular freight trains require seven minutes to traverse from one town to the next, or at the speed of 50 miles per hour. Just to make the work interesting for the men at the various stations, Bagley runs the mechanism slowly for awhile and throws the trains off schedule.

(Continued to page 2.)

Hyperians Will Picnic Tonight At 5 O'clock

The Hyperian society will have a picnic Tuesday at 5 p.m. at the summer cottage of Miss Henrietta Quilling, secretary - treasurer of the Stout alumni association and Hyperian member. The picnic will include recreation and swimming and a review of the year's work and most important of all—food.

Dorothy Woerth is in charge of the refreshments with Marie Hansen, president of the society, is in charge of general arrangements. Irma Miller will take care of transportation.

Miss Luella Wright, faculty advisor and Mrs. Arthur Becker, town adviser, will be present.

MARGUERITE ROETTIGER HAS UNUSUAL DISPLAY

Cork, door hinges, cord, and brass make coat buckles, belts and dress trimmings which will be displayed by Marguerite Roettiger of Fountain City, Wis. She will teach next year in the junior high school in Clair City, Minn., and will have an exhibit on the second floor of the home economics building some time this week.

The exhibit will be of original belt buckles, unique buttons and unusual belts. The purpose of the exhibit is to demonstrate the inexpensive things that can be made out of the material available in any small town. She is doing the work as a special project in advance clothing problems class.

Industrial Grads Organize Group

Elect Officers and Executive Board at First Meeting on Monday

Conrad Bechtold of West Salem was elected president of the graduate men's group at its first meeting Monday afternoon in the I. E. building. The men met for the first time as an organization, and will decide on a name for the organization at a later meeting.

Assisting Mr. Bechtold as vice-president will be Roman Tomkiewicz of Milwaukee, and Oren Stamstad of Black River Falls will be secretary-treasurer.

Those elected to the executive board are Henry Clark of Kenosha, Edward Reed of Washington, D. C. and Henry Schulze of La Porte, Indiana.

The men have organized for the purpose of furthering their professional and social interests.

Unique Dinner Honors Mr. and Mrs. Burbidge

Mr. and Mrs. Earl Burbidge were given a unique progressive dinner Saturday evening which started with fruit cocktail at the home of Dr. and Mrs. Dawley. The guests and hosts then went to Dr. and Mrs. Shafer's home where the main course was served.

Salad was served at the home of Dean and Mrs. Price and desert was served next at the residence of Dr. and Mrs. Grinnell. Coffee was enjoyed and the remainder of the evening was spent at the home of Dr. and Mrs. Robinson.

Mr. and Mrs. Burbidge received a year's subscription to Time magazine from those present.

Mrs. Gertrude Johann-Stagnon '30 has accepted a position as commercial food demonstrator for the Shellane Gas company which furnishes tank gas to homes for gas stoves in cities which do not have municipal gas.

SCHEDULE CHANGE

The Lynwood kittenball game in the city recreational league, scheduled to be played Tuesday night against the Vikings, has been postponed until Friday night at 6:30, according to Clarence A. Berg, director of the league.

YOU DON'T SAY! DID SHE REALLY!

If someone were to step up to you and tell you quite confidentially that butter would sell for 11 cents a pound next week, you would turn upon him and with a fishy eye inform him that you were not sap enough to believe that, even if he did.

If your most trusted friend were to break in upon your meditations with the statement that Ted saw Johnson catch a 12 pound wall-eye or that Bill Jensen told him that Henry Ford was going to come out with a four hundred dollar V-8 next year, you would smile tenderly at him and say, "You're too gullible, Sam. Don't believe everything you hear."

BUT if Sam or anyone else were to crook his finger at you and confide in a stage whisper that he had heard that Lena Duster had been seen drunk with a married man at the Hollyhock Inn, or that Mrs. De Berry had been seen riding with Tom Muster up along the river, would you express your wholesome doubts? Would you tell him that you knew Leon Duster too well to believe what he said without proof? Would you suggest that he was gullible or that somebody was mistaken or malicious?

Maybe you would, but if you are like most of the people I know, you would say with a gleam in your eye, "You don't say! Did she really go out with him? I always thought she was a little hellcat." And you would insist on details, most of which would be supplied from your informant's imagination. You would recognize traces of his imagination, too, but you would not be so rude as to discourage him with a doubt or two.

WHAT OF IT? Why—nothing much. If you are that way it will be harder to make you believe that you are than it would be to reform you if you admitted it. But I like to think of a world in which no one believes bad about anyone else until it is proved. I wish I were sure I could qualify for such a world.

Mrs. Meslow Likes Camp And Travel

by Rosie Carlson

"I hope to go West—and the farther the better," was the reply of Mrs. Myrna Meslow, instructor in home economics education when she was asked how she hoped to spend the remainder of the summer after school. "Camping—traveling are my hobbies so I expect to do that in my trip West."

Mrs. Meslow is a Menomonie girl and a graduate of Stout. She received her master's degree at Minnesota.

"I have a keen interest for swim-

ming but during this summer session I haven't had much time for it," she said.

Mrs. Meslow, together with Miss Walsh and a few other people, have been busy working on the course of study. Along with this she has been working on a table service bulletin which is to be published in the near future.

"In the fall I'm going to Waukegan and keep house for Mr. Meslow. It's been fun coming back to teach this summer, for there is such a nice group here.

"My experimental cookery and food investigation classes are very interesting and the girls have worked out a number of fascinating problems," she concluded.

Class In - - -

(continued from page 1.)

Then he speeds it up a bit and makes the trains get back on schedule.

To make sure that the students will get the most out of their training, the line is single track, not double, so that certain trains must be held while "extras" or "specials" are allowed a clear track.

In the handling of the transportation end of the course, Bagley acts as the dispatcher, and sits at the loop at the middle of the 60 foot track.

In the traffic department, the set-up is a bit different. Twenty students, mostly girls, are accommodated at one time for there are 20 stations. They are not located on the train line, but are at separate desks, and all of the work is clerical.

Each student keeps the station agent's books, and transacts all necessary business. A mail department is maintained, and each morning each station agent must look in his mail box to start the day's business.

The situations necessary to teach this end of the work are worked out in job sheets and students progress from one job sheet to the next. The waybills and other forms needed in this department are donated by the various railroads in this section of the country. It is interesting to note that 66 forms are used in this study.

The entire department is inspected periodically by inspectors from the Milwaukee and the North Western railroads and each time the report is favorable. Various railroad executives have inspected the set up and found it satisfactory. Bagley has a sheaf of letters from various of these executives proclaiming their interest and amazement in the course.

During the past year, 22 graduates were placed from Bagley's department alone. His students do not go out only into railroading, but into any business that is in any

way concerned with transportation problems.

Mr. Bagley laid out the course under the supervision of Tom Rees, director of the vocational school. A council of 15 members, consisting of five men from the North Western railway, five from the Milwaukee road, and five industrial traffic managers, make up an advisory council for the course, and they make regular reports. The vice chairman of the committee of public relations of New York City sends weekly reports on transportation to Mr. Bagley to be used in the class.

Mr. Bagley has an ample railroading background for the course. He has had 21 years of railroading, 18 of which were in the railroading, and traffic end, and three of which were in timekeeping and accounting. He performed these services for the North Western, Milwaukee, and Soo lines.

All of the traffic work is done according to the tariffs and laws approved by Interstate Commerce Commission. All train operations are regulated by the American Railway Association Standard Code of Rules.

A letter was received requesting that a catalog be sent to the writer and then no signature was signed to the same. It was received at the office of the president Monday.

This is not the first time such a letter has come to the office but in this case the street address was on the envelop, and a catalog was sent to that address at La Crosse for a party designated at ???.

Several letters requesting catalogs have been received with only Harry or Bill as an address, but none have been received which were written anonymously before.

Sample form of Canadian humor as published at the University of Manitoba (Winnipeg) — It is in the form of a riddle: "What goes 99 plunk, 99 plunk, 99 plunk?" The answer, believe it or not, is "A centipede with a wooden leg."

Furniture Upholstering Class Takes Field Trip

Fred L. Curran's class in furniture upholstery went on a field trip to Minneapolis Thursday. They visited the firm of Levin Bros. in Minneapolis where they were courteously shown through both the frame factory and also given detailed explanations of the upholstery department which is separate from the woodwork shop.

The entire class consisting of Edwin L. Rudolph, Charles Illingworth, Francis Rose, Clifford Culver, Clifford Leonard, Wilmer B. Flory, Lester Hawkes, and A. Speece started their tour at 2 p.m. and were still gathering information at 5 when the factory closed.

Stout Institute Visited By Many This Week

The foods demonstration class as instructed by Miss Buchanan will give public food demonstrations during the next week on several different kinds of cookery. In room 325 on the third floor, Miss Betty Christopherson will demonstrate Norwegian cooking. The demonstration starts at 2:30 on Thursday.

Friday, in the same room and at the same time Catherine Skeels will give a demonstration on pastery. Other demonstrations will be given later and will be announced in The Stoutonia.

Gail Galloway '33, who has been employed by Carson, Pirie, Scott & Co. of Chicago since her graduation from Stout, has just received an appointment to be personal shopper for that store.

Mr. and Mrs. R. L. Brown and son of Fergus Falls, Minn., visited Stout Monday. Mr. Brown is superintendent of schools at Fergus Falls. His son intends to attend Stout next year.

Hansen Plans Course For Following Summer

As the result of discussion on the prospect of constructing cedar lined black walnut chests, occasional tables, and drop leaf dining tables during next year's summer session, special consideration has been given the possibility of offering a two credit production course of these projects next summer.

This preparation involves the selection of some one of two or three projects followed by the preparation of full sized working drawings, roughing bills, squaring bills, and the like. For the best possible arrangement these preliminary arrangements should be made this summer so that the necessary setting will be ready for next summer.

H. M. Hanson, instructor in the course, promises that all the machine work and perhaps most of the assembling can be done during one summer session, if the preliminary arrangements are made this summer.

With plans all made in advance, \$3 to \$10 worth of material can be turned into a project which is worth from \$20 to \$90.

Any one interested in making tentative arrangements should see Mr. Hanson soon. Each individual's choice or proposal for a project will be taken then.

The projects that have been mentioned have all been constructed at one time or another in the shop and have been on display, and each one created a favorable impression.

Mr. Hanson predicts, "The majority of the students will be well pleased with the design and construction of these projects."

Central Walloped By Dormitory Team, 22-5

Lynwood trounced its fourth victim, the Central team, in a 22 to 5 slugging fest at the Stout lot Friday night immediately after the school picnic.

Prim was on the receiving end for Lynwood, with Gaertner on the mound. Braker and Schultz were behind the bat for Central, Lee Moe twirling.

Kess ruled on the strikes and balls. Stori was the umpire on bases.

Darkness called a halt in the seventh inning.

Marion Hiekel '35, of Stoddard, Wisconsin, will teach home economics in a George Ellsby department at Webster, Wis

If you are late to a class at the University of Akron (Ohio) you are fined five cents, the money to be used to purchase a bench for the students to sit on during leisure hours.

H.S. Positions Obtained By Lohr And Erickson

Karl Lohr '35, of Battle Creek, Mich., will teach in the Urbandale high school in Battle Creek.

Luella Erickson of Virginia, Minn., will teach next year in Stanley, Wis., high school. This position was first filled by Rosamond Carlson of Eau Claire, but who has since taken a position with the Northern States Power company at their Eau Claire office as demonstrator.

All-Star Team Upsets Lynwoodites At Picnic

The Stout All Stars, a pick-up of kittenball experts, took a five inning game from the Lynwood kittenball team, 10 to 9, at the picnic last Friday at Wakanda park.

Burbidge and Erpenbach were the arbiters, of play in the game, which was one of the sports featured at the picnic.

This game does not count in the

city recreational league, according to C. A. Berg, director of the league.

Mr. Brown, president of the Provincial Teachers college at Moose Jaw, Saskatchewan, Canada, visited Stout Friday of last week. He was especially interested in home economics and industrial education in his tour of the teachers colleges of the United States.

He said that the only difficulty with teaching these courses in the colleges was that the courses were only one year courses, and it was difficult to add more to the already heavy schedule.

Three Short Plays Show Wednesday

Dramatics Class Students Will Make Up Cast of One-act Presentations

In one of those little places that women call "cozy" and the sort of a place that a man would not enter to escape a blizzard a little drama takes place that will amuse and interest you.

This setting is the scene for the play "The Tea Pot on the Rocks" which will be presented Wednesday of the last week of the summer session.

This tea room has the usual bell with its silly jingle which is supposed to announce customers to the proprietor in the kitchen. But like all others has small use for there is no business.

You'll enjoy Ruth Vigerust as plump, yes, but pretty in her Mae West style and enjoyable though not active, being hopelessly averse to any form of physical activity.

There's Betty Keith in the part of May, vivacious, small, and alert, but having a hard time making a tea room pay. They are partners in this venture in the business world and their troubles make an interesting story.

If you like culture and refined, aristocratic opera, see the "Opera Matinee," and its satire will prove to you that all is not refined that sounds like grand opera.

The knowledge that comes with age, seasons the story of "Grandma Old-Style" in the play by that title as presented on the program. You'll love the character of the old fashioned grandma who is only old in years but whose ideas and mind are capable of understanding the young as well as the middle aged members of her family.

These plays, being produced by the dramatic coaching class, will be presented free to summer school students and townspeople on Wednesday, July 31.

TEA ROOM CLOSING ACTIVE SEASON WITH TWO LUNCHESES

The tea room staff will serve luncheon today in the Stout tea rooms. Misses Helen Diedrich and Jane Green are entertaining guests at two tables.

Tuesday noon will be the last luncheon that will be given this summer in this department. Reservations can be made by signing the reservation list in the corridor of the first floor of the Home Economics building.

CLEARANCES

Dormitory residents are requested to pay all fees to Mr. Funk, business manager, before Tuesday of next week, July 30. Records are not released until all clearances are on file with the registrar and the business manager.

League Leaders To Meet Monday

Lynwood and Viking Game To Determine City Championship

Lynwood's kittenball team and the Viking team will battle to the finish in their game Monday night when they meet at the Stout lot at 6:30 p.m. The Vikings and Lynwood are tied for first place in the city recreational league and the game Monday will decide the winner of the league since there are no other teams anywhere near the two in percentages.

The Viking team consists of players from North Menomonie.

The Lynwood team consists of Rishoi, Pribbenow, West, Notebaart, Danielson, Gerken, Will, Ainger, Mezzano, Reed, Christianson, and Gaertner. Gaertner, Pribbenow, and Wivell will be the probable batteries for the Lynwood team.

A large crowd is expected for this game by Clarence A. Berg, director of the league.

Education History Class Studies Rare Old Books

Fred L. Curran's history of education class will make a trip tomorrow to the University of Minnesota library. They will examine some of the sixteenth and seventeenth century books which will be made available for them at that time.

These books are rare and are not for the general use of the students at the university but will be taken to a special room for the class to study them. These books are mainly on philosophy, science, and medicine and show the old styles of printing and binding.

The members of the class that will be taking the trip are: Oya Anderson, Ray Bechtold, Mrs. Marie Dhein, Edgar Gracie, Mrs. Ellen Huston, Elmer Musberger, Margaret Moe, and Harold Pribbenow.

Final Mixer Dance Of Season Tonight

A summer session mixer dance in the gymnasium this evening, from 8:30 to 11:30, has been announced by Merle M. Price, dean of men and chairman of the mixer. Music will be furnished by a local orchestra.

Coupon ticket number 5 will admit summer session students. Members who wish to bring members of their immediate families may request guest cards at the door.

Admission for others will be 35 cents.

Hazel Van Ness An Equestrienne

by Rosie Carlson

"My home town is Baldwinville," said Hazel Van Ness, clothing instructor, when interviewed about herself. "It's not far from Syracuse, so I went there to the university, where I received my B. S. degree. Then from there I went to Columbia for my master's."

"I don't think I'll write a book. In fact, I haven't given it much thought."

"Horseback riding is my hobby, but the only trouble is I can't find time enough to ride. I like picnics, too—especially steak fries—but not in hot weather."

When she was asked about the subject of summer school, she replied, "I think we have the same type of people here this summer as we did during regular session. They are all so interesting. It's really fun teaching in summer school for those in attendance relate so many interesting experiences. It seems to be a more informal group, too."

"I'm undecided if I will go home to New York or out to Glacier national park after summer school, but I certainly did enjoy my trip up to Port Arthur and North Wisconsin during the three weeks between regular session and summer school," she concluded.

TOOL EXHIBIT

The Stanley Rule and Level company will have an exhibit of tools and equipment Monday, July 29, continuing through to Wednesday, July 31 in the corridor of the Industrial Education building. The exhibit will be in charge of their representative, Fred J. Gross.

Visual Education Made Practical

Individual and Group Projects Produce Visual Aids in Varied Subjects

Paul C. Nelson's class in visual education has been doing quite a bit of work this summer session. Various members of the class have been working on individual projects, some separately, and some in groups. Most of their efforts have been concentrated toward producing visual aids that may be used in their own subjects.

Together the class is working on the film which will depict activities of Stout, and which will be used as an advertising film for the school, and which is to be shown in high schools.

This film was started by the visual education classes during the past regular session, but the summer session students are continuing work on the film.

STOUT FILM

The film depicting activities around Stout shops and laboratories will be shown in the auditorium at 4:30 Tuesday afternoon by members of the visual education class who have been furthering work on the film started by the class in the regular session.

It will not be completed for some time yet.

For such a film, titles are needed, and the members of the class have constructed a titler, and will soon be photographing the titles for the film.

Free movies, both sound and silent, have been shown at the summer camp colony by members of the class, as have also films been shown in the auditorium the past few weeks. These films have been obtained through regular distributors.

Three New Placements Recorded This Week

Alice Haselrud has accepted a position as assistant dietitian in the New Britain General Hospital at New Britain, Conn.

Carl Brenner '35 has accepted a position as industrial arts instructor in the public schools of Newark, New Jersey.

Albert Feirer, 1935, received an appointment to a position in the city schools of Honolulu, Hawaii.

IF I'D WON IF I'D—

Of all the balms to wounded vanity, of all the phrases dear to self-esteem, none is so necessary to us in our moments of defeat as "I'd a won if I'd had the breaks he had." We may vary it infinitely. It may be we are accounting for the other fellow's success. "I'd a won if he hadn't had such luck hitting the back lines." Just as likely we are saying how good we are: "I'd sure have won if I hadn't slipped into that trap on the fourteenth."

Curiously enough we never do see that our loss may have come about because the other fellow was a little better than we were. He has beaten us five times in a tennis match, but we still console ourselves that he's had fool's luck on his placements; and as for us, well, we'll get into our stride one of these days and our placement will be just inside (where we were sure they would be but for our cursed luck) instead of just outside. Or maybe in golf he was in with three less strokes. It isn't our golf that's bad. We were getting bad breaks, of course, but whoever saw such luck as his on the greens?

We just missed getting an A in Economics II. We just missed wining the green-eyed girl with the yellow hair. We just missed winning the ten dollar prize for a club slogan last year. We took second in oratory, but we shoulda been first. You see, it was this way—

Let psychologists and philosophers and whoever else can and will rob us of all our illusions about ourselves if they will, but spare us the divine right to believe that we should have won if we'd had the luck—The Other Fellow had.

Ninety-five Years Teaching Experience Found In Wigen's Supervision Course

A great deal of experience is found in the members of Ray Wigen's course in supervision and administration. There is a total of 95 years of teaching experience and an average of seven years each.

Each student has worked out and submitted a year's supervisory plan. The men who had teaching positions worked out plans concerned with their particular situation.

"The conclusion of the group upon reviewing national surveys is that there is a new deal in line for the field of supervising," says Mr. Wigen.

This new type of supervision is creative and combines democratic and scientific supervision. A greater responsibility being placed on the initiative of the teacher. The

emphasis of supervision shifting from administration activities to the activities concerned with the improvement of instruction.

In the class are John Ausman '34 Milwaukee; Conrad Bechtold '32 of Cleveland; Henry M. Clark '33 of Kenosha; James C. Dodge '31 of South Milwaukee; Ernest Ebert '35 Superior; Frank Mann '31, Clear Lake; Karl Miller '34, Charleston; Clifford Morissette '33, Milwaukee; J. R. Mulholland, Charleston; Clifford Peterson '29, Sioux city; Lester Puhl '35, Menomonie; Edward Reed, Washington, D. C.; Louis Rogge, Louisville; Carl Roll, Charleston; August Schlumpf, Charleston; Oren P. Stamstad '33, Cumberland, Md.; Harold Steen '33, Osseo, Wis.

Charleston Boasts Of Five In Graduate Work

When it comes to the point of teacher improvement, Charleston, W. Va., leads the field, according to J. R. Mulholland, director of city and county public schools at Charleston. Perhaps only one town in the state of Wisconsin has more teachers in the graduate school at Stout than Charleston and that is Milwaukee.

There are 12 Stout men on the force of 28 in the teaching staffs of Charleston, and 5 of them are entered in the graduate school this summer. These men came 1,000 miles to attend Stout, and there has been as many as 9 teachers at one time taking bachelor's degree work here in the past. All the teachers from Charleston that are here this summer are former graduates.

The schools of West Virginia are trying a new experiment of consolidation of schools under the county unit plan. Mr. Mulholland states that they are finding both advantages and disadvantages in the new system.

Reuben Carp, a 1935 graduate, was from the city schools there, and will be given a teaching position in the system this coming fall, according to Mr. Mulholland.

Those attending the graduate school are: J. R. Mulholland, director; Karl Miller, Carl Roll, August Schlumpf, and Elbert Barnhard.

May E. Colling, Mineral Point, Wis., who is teaching in the vocational school at Kenosha, was a visitor at the Institute Wednesday.

Lyle Garnett is constructing a model of a 45 foot cruising yacht. The model is constructed in three quarter inch scale and has a spring motor that will drive it for 10 minutes.

PAINTERS AND DECORATORS REFINISH CLUB FURNITURE

Ray Wigen's painting and decorating class has refinished the wicker furniture from the club rooms. Thirty pieces of wicker furniture have been finished in this course this summer. They were painted various hues of natural grey and high-lighted with bronze, then covered with a clear, flat varnish as a final coat. This varnish prevents any coloring from coming off on clothing. The students did all the painting and spraying of this furniture, and a really fine job was the result.

Reorganized Colony Team Is Defeated

The Colony kittenball team went down to defeat at the hands of the Millers, 5 to 13 when they played their game at the Stout lot last Wednesday night.

A newly organized team has taken the place of the Colony team and have held no regular practices until they romped over the diamond five times Wednesday night.

The new Colony team is composed of Cvengros, DeMerit, Clark, Cigard, Ritzman, Eng, Hawkins, Gabriel, Steinke, Shafer, and Henke.

Mr. and Mrs. George S. Tait, Benson, Minn., have announced the marriage of their daughter, Evelyn Mary Tait, to Joseph A. Neudecker, '33, Appleton, Minn., August 8. The couple will live in Appleton, where Mr. Neudecker teaches.

Mr. and Mrs. Rudy Kogl, '32, St. Paul, Minn., who teaches in the St. Paul vocational school, visited Stout recently.

Ora Bell Burchfiel, '16, Oklahoma City, visited Stout Wednesday.

Graduate Work Calls For Reference Books

The library of The Stout Institute has been increasing the number of volumes it contains rapidly since the addition of master degree work at Stout.

One order for 30 books contained, mainly, books for the graduate course given by Dr. J. Erle Grinnell; another order for Mr. Wogens and Dr. Dawley's new courses amounted to 42 books. Forty-one new books have been received for the home economics school.

Each year the number of books in the library is increased 1,000, and there are over 15,478 volumes on the shelves now. One hundred and twenty-six books, mostly text books, were sent away at the end of the regular session to be rebound.

The cost for this is 60 cents a copy. One new book that has just been added cost \$20 and was a new revised edition of Webster's dictionary.

To the list of magazines which numbers 160 has just been added

Nutrition Abstracts and Review, a technical magazine published in Scotland.

The noticeable increase in the number of new home economics books that have been published recently and added to the library is striking. The library gets 7 daily papers at present and has not made any additions to the list this summer.

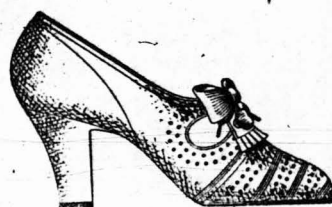

"Summer session students are much more prompt in bringing in books than the regular session students," says Miss Froggett, the librarian. She also stated that at the end of last year's summer session there was only one book that did not come in and that was taken care of after school.

Instructors Plan Their Trips For Short Vacation

**Nelson, Good, and Ray Plan
on Short Fishing
Expedition**

ENTIRE UNION IS COVERED

**Women Faculty Members Will
Visit Various National
Parks**

Paul Nelson, H. F. Good, and J. E. Ray plan to do some river cruising during the five week vacation after summer school. They will take a motor boat trip on the Wisconsin river and the Mississippi.

H. M. Hanson is going to Beloit, Wis., to see a new line of small machines that the Yates-American Machine company are building. He will spend a few days at the forests products laboratory at Madison on his return trip.

Mr. and Mrs. H. F. Good and daughter, Miss Jean Good, and Miss Dorothy Cain, who teaches at Manitowoc, will leave Wednesday of next week for Yellowstone and Glacier national parks. They will spend two weeks on the trip.

Mr. and Mrs. Fred L. Curran and family will spend part of their vacation at a cottage on Pleasant Lake. Mr. Curran expects to do some trout fishing while there. Later they will visit some relatives in Illinois.

Dr. and Mrs. J. Erle Grinnell and Dr. and Mrs. Shafer will leave Sunday morning by car on a trip east. They will make a special stop at Quebec and from there go down through Maine stopping at the fishing villages on the way. They intend to stop a day or two in Boston and New York before they return.

The Shafers will stay at Bucyrus Ohio for a time on the return trip.

Mrs. Houston plans to take a trip to San Francisco, Los Angeles and the exposition at San Diego. She will visit the Grand Canyon on her return trip. "I'm looking forward with great pleasure to traveling in absolute comfort regardless of weather in the new air conditioned trains," says Mrs. Houston.

Miss Hassler, speech instructor, will travel to Yellowstone and Glacier national park. From the parks she will go to Lake Louise in Canada and from there to Seattle, Portland, and to San Francisco via the Redwood highway. Miss Hassler will also visit the Grand Canyon on her return trip. The entire trip will take the full five weeks.

CLEARANCES

Before any student's record is clear, all fees must be paid in order that your official summer session certificate is mailed. This includes those in the business office, and also the library.

Milnes Elected To Psi Chi At Ames

**Receives Bid from National
Honorary Psychology
Fraternity**

H. C. Milnes, machine shop instructor, was elected to Psi Chi, national honorary psychology fraternity, Iowa State chapter, at Ames, Iowa, last week, where Mr. Milnes is working on his graduate work this summer.

This is the National Honor Society in Psychology, organized in 1929, and the Iowa State college chapter is a charter chapter. Candidates are selected on the basis of scholarship, achievement and interest in psychology. The organization has as its chief purpose the promotion of interest in psychology.

Mr. Milnes was initiated into the fraternity on Tuesday, July 15.

Mr. James Dockar, better known as Scotty, is taking Mr. Milnes' place this summer in the machine shop instruction.

Dr. Boyd Shafer Has Documents On Labor

Dr. Boyd Shafer has in his office virtually all the documents on child and women labor and their hours, wages, and employment conditions. He has occupational statistics, and union literature that he has been gathering for the past year or more. He receives both the bi-weekly and weekly bulletins on wholesale and retail prices, working conditions, and building construction, etc., published by the government. This material might be of interest and valuable to students other than those in his class and are available for their use.

STOUTONIA NOTICE

The last issue of The Stoutonia will be issued Thursday noon instead of Friday of this week, because the staff has other things to do Friday.

Plays Given Free in School Auditorium Tomorrow Nite

**SCHOOL CATALOGUES WILL
BE MAILED ON REQUEST**

Summer session students who desire catalogues of the school sent to individuals may leave names and addresses of such individuals with Miss Margaret Santee, president's secretary, and the literature will be mailed promptly.

Picnic Enjoyed By Graduate Women

**Home Economics Graduates
Gather at Quilling's
Cottage**

Graduate women and the members of the home economics faculty who have graduate women in their classes had a picnic at Quilling's Cottage on Tainter Lake Thursday afternoon.

Upon their arrival, some entertained themselves by swimming and others by watching Mr. Tustison of the physics department in his innumerable unsuccessful attempts to start his one-cylinder Johnson outboard motor.

He was eventually forced to call to his assistance a young man of the graduate department. Several students and faculty members then demonstrated their prowess in diving, much to the delight of the spectators.

Dinner call was answered with alacrity and anticipation. Appetites whetted by wind and water were fully satisfied by cold meats, potato chips—in quantities—fresh vegetable salad, huge plates of over-sized rolls, cakes, and gallons of iced tea.

After dinner, baseball was given up before it got fairly started after a tragic accident to a pair of glasses. When the mosquitoes claimed the lawn for their own, the party broke up with congratulations to the committee for such a successful affair.

LYNWOOD CINCHES CITY KITBALL CHAMPIONSHIP

Lynwood's kittenball team, captained by Jack Notebaart, virtually clinched the city recreational league championship by walloping the Vikings last night, 9 to 6. Ainger and Wivell were the batteries for the winning team.

**"Grandma, Old Style" is First
Play on Evening of Entertaining Plays**

MEN'S QUARTETTE TO SING

**Quartette Includes Holman,
Snoyenbos, Martin, and
Slette**

The dramatic coaching classes, under the direction of Miss Hassler will present three one-act plays in the auditorium tomorrow night, July 31, at 8:15. There will be no admission charge for this performance.

A quartette composed of Jay Holman, Dorr Snoyenbos, W. G. Martin, and Alfred Slette will give several selections between the one-act plays.

The class has spent the entire summer session practicing these three productions, "The Tea-Pot on the Rocks", "The Opera Matinee", and "Grandma—Old Style."

The cast for "Grandma—Old Style" is as follows:

Grandma Bowdoin, Marie Levenhagen; Grandma Clark, Louise Kirk; Bessie Bowdoin, Amelia Smilanic; John Bowdoin, Fred Darling; Willie Bowdoin, Douglas Clausen; Mildred Bowdoin, Gladys Anderson; Director, Gladys Fuhrman.

The cast for "The Opera Matinee" is as follows:

Narcissa, Gladys Fuhrman; Sheila, Gladys Anderson; Mrs. Harrison, Amelia Smilanic; Mrs. Lyssander, Betty Keith; Mrs. Murphy, Myrtle Swanson; Countess Jerahek, Mrs. Ethel Martin; Mrs. Casper, Louise Kirk; Mrs. Gardiner, Vivian Patrick; Mrs. Kennedy, Ruth Vigerust; Mrs. Vail, Harriet Gunderson; Reporter for Morning Moon, Fred Darling; Reporter for Mira Star, Douglas Clausen; Director, Marie Levenhagen.

The cast for "The Tea-Pot on the Rocks" is as follows:

May Lovelace, Betty Keith; Daisy Anderson, Ruth Vigerust; Mrs. Carstairs, Harriet Gunderson; Roy Williams, Douglas Clausen; Willie, Fred Darling; Alec, Fred Darling; Director, Myrtle Swanson.

CONGRATULATIONS, PREXY!

President Burton E. Nelson is today celebrating the start of another useful year in the interests of industrial education. Students and faculty unite in wishing him the best returns of the day.

EVERY STALK WAS DOWN

The old gentleman switched his quid to the other side and said with an air of conviction, "Yes, sir, every stalk was down. There won't be a dollar's worth of corn harvested between here and Adams."

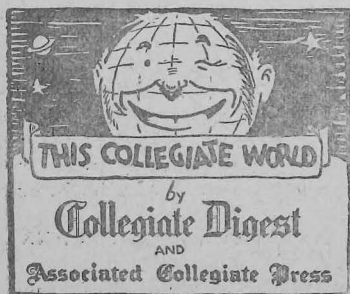

Mrs. Jennings added a postscript to her letter, "And Mable, we just had a rain here that came down in sheets. You wouldn't believe it, but the water ran a foot deep in the streets."

The college tenor confided to the college alto, "And I had to walk—it must have been at least six miles before I came to a service station."

Hyperbole. What a mysterious and stupid word for one of our rarest pleasures in life—stretching the truth as far as our audacity will permit. What matter if we don't believe half of the exaggerations of others! We still get boundless delight in making sensational that which is ordinary, in making heroic that which is commonplace.

We may be ever so truthful with ourselves. We may be totally incapable of lying or cheating for any sort of personal gain that we are aware of. But we can never resist the temptation to bear startling news, to say, "Believe it or not, I saw a fish just this side of the bridge that weighed forty pounds if it weighed an ounce," or "There was two feet of hail on the level after the storm passed."

The tall lie is not a thing of the past. It did not pass with the creators of Paul Bunyan and the saga of the West. In every little town, on every college campus, over the radio, on roadside billboards—everywhere it shouts its elastic fact to the world. It is American and beyond that, human. But it does stand in the way of the most beautiful thing in life—
TRUTH.

Not that it's important—but any way, the girls at the University of Washington (Seattle) affirm that men look better smoking pipes than

cigaretts. (How many of them have tasted a ripe pipe?) Since girls now have taken up fags, men no longer appear very masculine smoking them, they have decided. We admire the honesty and discernment of one of those coeds. She suggests that the reason men look more masculine with pipes is that they have to thrust out their jaws to hang on to them.

Editors of the Daily Illini at the University of Illinois (Champaign) resurrected from their 1873 files this item: "Since the admission of girls to this university, not many

FRIDAY, AUGUST 2

Final Examinations—Regular class periods.

Classes will operate through Friday of the sixth week, August 2. The Stout Institute strongly discourages an early departure. The special examination fee applies where a special examination is required in case of an early leaving. Examinations will be conducted during the regular class periods at designated times during the week, in most instances on Thursday and Friday. An exact selection of days and number of periods will be determined in terms of the requirements of the individual courses.

boys go unshaved and uncombed, a still smaller number go collarless, and no one is found with his pants in his boots."

This mad world is going madder trying to find names for new types of madness.

That's the general summary of a survey by a professor at the University of Texas (Austin) who has compiled a list of names for various phobias. He has 176 titles to date. For example: "Bathophobia."

No, it doesn't mean aversion to the Saturday night ablutions. It means dread of high structures.

The most hilarious story of the week comes out of the deep southwest, from the University of Texas (Austin), where a young man got an "A" in a course for the first time in his mental career and immediately wired his folks to tell them about it.

To be sprightly, he added humorously that he had suffered a nervous breakdown as a result. Four hours later, a dust covered car skidded up to his fraternity house door and out stumbled his parents.

The lad's "stopless" telegram had read, "Offspring Get A Nervous Breakdown May Recover."

Recent gain to the world of thought: "Men are just as dumb as women," said art authority George Opdyke at Purdue University (Lafayette, Ind.).

Coeds seem to be taking it on their un-shiny noses all over the landscape. A psychology professor at Northwestern University (Evanston, Ill.) insists publicly that girls try to make lower grades so as to appear inferior to the men, thereby making dating easier.

Then comes the male survey at the University of Oregon (Eugene) wherein the majority of men queried reported their belief that coeds are pseudo-sophisticates. Furthermore, one group of them voted 15 to 5 that "down-town girls" were more suitable for dates than the campus beauties.

Reaction among collegiate columnists to the information supplied in this column recently about Harvard professors seeking to learn where the Harvard accent comes from: We do not care where it comes from and do not care if it goes back there.

College editors, who may some day be Washington correspondents, already know—at least some of them do—how closely President Roosevelt is guarded by the secret service. A group of them was waiting in an anteroom to see the president. The door opened and they began to file inside. One editor said good naturedly to another: "Come on, comrade." The word "comrade" was enough—the lads were immediately grabbed by huskies and thoroughly inspected.

Now that the fad of tinting the toe nails has become so boring to the American coed, we suggest the newest stunt, inaugurated in a woman's college out in the pioneering state of Colorado.

There they sign their letters with a kiss, each girl striving for her own particular shade of lipstick for the signature.

Mrs. John Larson of Iowa City, Iowa, is spending a week with her sister Mrs. Boyd Shafer.

I. E. C Class Makes Inspection Tour

Visits Various Steam, Water Power Plants in Twin Cities

The industrial mechanics class taught by H. F. Good took an inspection trip Monday to Minneapolis where they visited the Northern States Power company high bridge, steam power plant. They also visited the plant of the Minneapolis Power Implement Company and the Ford plant.

At the Minneapolis Moline company they were especially interested in the manufacturing process and production department, including the planning, routing, material scheduling, cost finding, and time and motion study. The personnel department was of interest, especially the methods of hiring, wages and promotion.

Those who went on the trip are George Lundvigson, Joe Horky, Melvin Swenby, Willard Hicks, Rus-

sell Browe, Stanley Raddatz, Mathew Gjeston, and Mr. Good.

Thursday of last week the class went to Chippewa Falls and Wausota on a tour of the water power plant there.

Repaired Upholstery Exhibit Up Thursday

Sample upholstering jobs will be exhibited in the corridor of the Home Economics building Thursday. Four of five sample pieces of the reupholstering work done in the course given by Fred L. Curran will be shown at this time.

On each piece of furniture a statement of cost and kind of cov-

ering will be found. These chairs and davenport have been completely reconditioned and upholstered this summer. New material was used throughout including webbing and filling. One piece is covered with the new curly mohair which is becoming popular this year.

If the research now being carried on by a professor at John Hopkins

University (Baltimore, Md.) is successful, automobile radios will no longer fade out at certain localities.

Tree Falls On Car At Camp Colony Saturday

Saturday morning during the storm that followed the heat wave of the week before, a tree at the camp colony fell and caved in the back end of Al Speece's Buick sedan. A branch cut a hole in the top of the car, and the paint was scratched. The tree fell within a few feet of the tent of Mr. and Mrs. Roy Du Charme. Mrs. Du Charme was in the tent at the time. The tree was slightly decayed. The damage was estimated between \$10 and \$15.

1936 S. S. Catalogue Mailing List Started

The summer session catalogues for 1936 will be mailed on, or shortly after, April 1, 1936. Bulletins will be mailed to those who requested them on the "Office Data" sheets during registration this summer.

Due to the difficulty in maintaining a correct, up-to-date mailing list, The Stout Institute has adopted the policy of sending bulletins largely on individual inquiries.

The 1936 summer session bulletin will carry complete information on both the undergraduate and graduate programs.

Solitary Placement Made During Last Few Days

One placement was made last week. Raymond F. McNaughton accepted an industrial arts position in DeForest, Wis.

Delta Schroeder, '35, from Platteville, Wis.; Dorothy Boody, '34, from Hudson, Wis.; and Walter H. Jeske, '30, Zumbrota, Minn., were visitors last week.

Frank Guyott, '29, from McKinley, Minn., and teacher in Cedar Rapids, Iowa, visited the school last week.

Adele Deans, '33, from Juda,

GRADE REPORTS

If a report of grades made on summer school work is wanted by students in attendance, a self-addressed envelope should be placed in the box outside the registrar's office.

Foods Classes To Give Reports Next Week

The class in experimental foods and food investigation will give a special reports Tuesday and Wednesday morning from 10:30 to 12:30. Those who will report Tuesday are Eleanor Tombleson, Gladys Ingalls, Marie Hanson, Sister Doris and Belle Soukup. The Wednesday reports will be given by Henrietta Quilling, Georgia Aber, Deborah Roberts, Mable Spink, and Mrs. Mable Shearer.

Wis., was a visitor last week. She teaches at Brodhead, Wis.

E. J. Kaiser, '32, from Menomonee, is home for three weeks' vacation from Lewis' Holy Name School of Aeronautics at Joliet, Ill.

Mary E. Rich, director of the training department at Bellingham State Teachers' college, Bellingham, Wash., is visiting at the home of her brother, Mr. C. L. Rich. She leaves Thursday accompanied by

her mother, Mrs. W. C. Rich, for the home of her sister, Mrs. B. L. Arms, Farmington, Maine. They will stop off for a few days in New York City to visit Mrs. W. C. Rich's daughter, Mrs. L. W. Hines.

Mr. and Mrs. C. L. Rich, professor of mathematics at Stout, will vacation at their cottage on Lake Winneconne, near Oshkosh. Mr. Rich says that he intends to do a little fishing and also do some fixing on his cottage.

THE STOUTONIA

Vol. XXV — No. 10.

THE STOUT INSTITUTE, MENOMONIE, WISCONSIN

Thursday, August 1, 1935

Crawford Is New Athletic Director

Succeeds Earl Burbidge Who Resigns to Study Medicine at St. Louis

In order to acquaint the summer session students with Coach Crawford, this story is reprinted from a spring issue of The Stoutonia.

Walter C. Crawford, one of the greatest tackles in the football history of the University of Illinois, a teammate of Red Grange on the Illinois championship team of 1923 and also on the Chicago Bears professional eleven, will become director of athletics and coach of football and other sports at The Stout Institute at the start of the 1935-36 school year. Pres. Burton E. Nelson announced this spring.

Crawford succeeds Earl Burbidge coach for the past five years, who is resigning to study medicine at Washington University, at St. Louis, Mo.

Crawford's coaching ability, personality, and character, endorsed strongly by George Huff, veteran director of athletics at Illinois, and Bob Zuppke, famous Illini coach, were main factors in his selection over 73 other candidates.

"Crawford is one of the best men who has been graduated at Illinois," Director Huff said. "I regard him as a high-class coach and feel that I can speak with certainty as he assisted in coaching our football team when I observed his work."

Crawford was an all-around athlete in Waukagen, Ill., but football, basketball, and baseball were his chief interests.

He was the regular left tackle on the Illinois football team of 1923, on which Red Grange played his first season of varsity football.

Crawford's chief coaching experience has been head football and head baseball coach, assistant varsity basketball coach, and instructor of physical education of the state teachers college at San Jose, Cal., where during his four years' service he turned out a team that tied for the championship of its conference, which was considered an exceptional showing.

Later he served as assistant coach at the University of Miami.

John L. Callahan, state superintendent of public instruction, stopped for a few minutes at the school yesterday while on an auto trip.

Limited Number Back Issues of Paper on Hand

A limited number of back copies of the summer session Stoutonia are available in the print shop.

Anyone desiring any specific issue is welcome to any number of copies. There are still several copies of the third issue which contained the summer session directory. Other issues exist in like amounts.

Come one; come all. If you don't come and get them, Hank the Hermit will have to carry them down to the boiler room.

Gala Homecoming Plans To Celebrate Dedication

Homecoming will be one of the highest of highlights at The Stout Institute this fall when Winona comes up to Menomonie on October 12 and helps the Stout football eleven dedicate the new Burton E. Nelson athletic field.

Hundreds of graduates are expected to participate in the festivities. The Homecoming parade is already being planned by various societies in the school, agitation is under way now to have a flag pole at one end of the field, and the newly organized band with the color guard will be on hand to make the occasion a gala affair.

A huge three-ton roller has been used to keep the field in excellent condition this spring and summer, and shrubbery has been planted all about the field. The entire field is enclosed with a cyclone fence. All indications are that the turf will be in good playing condition in the fall.

All graduates are urged to indicate their intentions about attending Homecoming sometime soon after school opens in the fall, so that arrangements may be made to handle the Homecoming crowds.

Winter Basketball Game Schedule Is Announced

Stout's basketball team has eight conference games scheduled for the 1935-1936 basketball season, with the first game starting directly after the Christmas recess.

Jan. 10—River Falls, there.
Jan. 18—La Crosse, here.
Jan. 24—Eau Claire, here.
Feb. 4—River Falls, here.
Feb. 7—Superior, there.
Feb. 14—La Crosse, there.
Feb. 21—Eau Claire, there.
Feb. 28—Superior, here.

Lynwood Cops City Kittenball Championship With No Defeats

Heinrich Gaertner Has Slight Leg Inflammation

Heinrich Gaertner, pitcher of the Lynwood kittenball team entered in the city recreational league, has been indisposed the past week with an inflammation on his left leg known as phlebitis.

"Heinie" found he could not straighten his leg last Sunday upon arising, and so has been under the care of Dr. Quilling ever since. He will probably be confined to his bed for several days yet, Dr. Quilling stated.

Robert Ainger has pitched in his stead on the Dormitory kittenball team.

The fellows who work in the dish room and whom "Heinie" has so unceremoniously left, stated their message to him was that he could come back now, as the dishes would soon be washed, and that all was forgiven.

Fall Football Schedule Left With Open Date

The 1935-1936 football schedule has been announced and is printed herewith for the benefit of those summer session students who will feel the urge to see their Alma Mater in action on the football field this coming season.

The football schedule is as follows:

Sept. 21—Macalester, here.

Sept. 28—Platteville, there.

Oct. 5—La Crosse, there.

Oct. 12—Winona, here (homecoming).

Oct. 19—River Falls, there

Oct. 26—Open.

Nov. 2—Superior, here.

Nov. 9—Eau Claire, here.

WANT A RIDE?

H. M. Hanson, machine woodworking instructor, is desirous of having a companion with him on his auto trip to Madison and Beloit the first of next week. He asks that anyone interested get in touch with him immediately.

Win Decisive Victory Over Menomonie Merchants, Score: 15 to 3

ALL WIDE MARGIN GAMES

Gaertner and Notebaart Are Captain and Coach of Victorious Team

Lynwood slugged its way into the city recreational league championship last night by beating the Menomonie Merchants, 15 to 3 at the Stout lot.

This last victory gives the dormitory team a perfect record, for the entire season, for they have gone through the season without a defeat, and with the majority of the games decided "walkaways."

Jack Notebaart and Heinrich Gaertner captained and coached the team through its battles. Gaertner pitched the first games, but was unable to finish out the season due to a leg injury.

Ainger pitched the remaining games, one of which was the decisive game with the Vikings, the only real rivals the Dorm team had.

Bill Wivell caught for the Lynwood bunch, while Pribbenow also assisted in Wivell's absence, usually due to trouble in Rock Falls.

The members of the Lynwood team are:

James Mezzano, William Wivell, Heinrich Gaertner, Peter Christianson, Robert Ainger, William Gerken, Dan Danielson, Jack Notebaart, Stanley Rishoi, Edward Reed, Alva Jones, Harold Pribbenow, Einar West, and Gordon Wells.

Clarence A. Berg, 1935 graduate, directed the city recreational league.

C. L. Rich Is Co-author Standard Physics Tests

The Torgerson, Rich, Ranney standardized tests in high school physics have now been completed according to C. L. Rich, mathematics and physics instructor here, and are being published by the C. A. Gregory Publishing company of Cincinnati, O.

Mr. Bongey, high school physics instructor and athletic coach, assisted materially on the tests on light.

1935 Summer Session Calendar

Below, in briefly tabulated form, is a summary of the activities of the summer session as gleaned from the files of The Stoutonia:

ISSUE OF FRIDAY, JUNE 28—

Total enrollment reaches 346, and is 41 more than those enrolled in 1934. Seventy-five seek their master's degree.

Dramatics class lays plans for three one-act plays to be presented the last week of school.

Students in assembly Friday voted to take a vacation on Friday, July 5, and agreed to make up the time on June 29.

The first party of the summer session was held in the gym at 8:30. Ted Pierson and his Cunard Line orchestra furnished the music for dancing. The club rooms were open and cards, ping pong, and billiards were enjoyed.

Rollo Walter Brown sounded the national-social-situation "key note" for the summer session in assembly Friday morning.

Stoutonias were distributed free to summer session students for the first time. Announcement was made that they would be distributed on Tuesday and Friday.

Gertrude M. O'Brien announces the placement of 21 graduates.

Students and faculty of the home economics school attend Home Economics convention in Chicago at the Palmer House.

Summer colonists begin to enjoy camp life. About 18 families, or 63 persons, comprise the group.

ISSUE OF JULY 3—

LaVerne T. Ryder of Rockford, Ill., and president of National Home Workshop Guild arrives on campus to direct home workshop activities in the home mechanics shop.

Statistics reveal that 21 states are represented in summer session.

Harvey Gordon volunteers to deliver the papers to the colony for the session.

Dean Bowman receives gift of lemons and oranges from Cochran of California as first instance of flagrant handshaking.

The club rooms announce their business hours.

Rifle club organizes for the summer session and practices on outdoor range at fairgrounds.

Roof on the H. E. building undergoes many repairs. New capstones laid.

Martha Dresslar, assistant professor of home economics at the University of Washington visited the school.

Child management class takes up activities with eight children in its care.

Dramatic coaching class chooses three one-act plays to be presented.

Edward Reed is announced as the man without a state. Has tough time living it down.

ISSUE OF TUESDAY, JULY 9—

Harry Farbman, well-known violinist, is engaged to play for summer session audience. Is well received by small but appreciative audience.

Miss O'Brien announces five more placements.

N. B. Giles, special agent for the United States office of education, leads informal conferences in industrial education.

Summer session directory is published. People are surprised at the state they come from in some cases.

Lynwood Hall and the Colony organize kittenball teams to compete in the city recreational league. Clarence A. Berg directs league.

People begin to complain about the ads.

ISSUE OF JULY 12—

V. J. Hydar, personnel manager of the Falk Corporation of Milwaukee, arrives at Stout to lead social science conferences.

Dean Michaels addresses home economics and home making instructors at the George-Ellzley home making conference at Madison.

Louis, the engineer, plays fireman to waste cans and puts out fire started by lighted cigarette.

Late summer school opening is desired by majority of students is revealed in check sheet filled out on registration day.

Official Bulletin

In the summary of a year ago, the statement was made, "There seems to be much in the records of the present summer to indicate that The Stout Institute Summer Session has begun its participation in the upturn."

The further increase this summer in the total enrollment over that of a year ago, the excellent range in student classifications, and the optimism in the reports on student work all point to sound, substantial advances.

The number and calibre of graduate students utilizing the graduate facilities of The Stout Institute in the first offering of graduate work has already brought many favorable reactions.

Plans for the 1936 summer session include a continued provision of an adequate undergraduate program and recognition of direction-pointers which have grown out of the graduate conferences this summer. Effort will be made to arrange a program of six-weeks courses, of short units, and of special conferences to meet the professional problems of the graduate students.

ISSUE OF JULY 16—

Drs. Grinnell and Shafer serve refreshments with classes to ward off drowsiness of hot weather.

Roswell announces opening of conference class.

Labor problems class, under Dr. Shafer, study their salaries and where they go. Find they spend more than they earn.

Phi U, home economics honorary fraternity, has enjoyable time at summer session picnic at Hofland's dam on Wilson creek.

Printers hold their annual "wazygoose" at Picnic Point.

Henrietta Quilling is elected chairman of the home economics graduate women at first meeting of the group.

Lois Ina Bunker enrolls for short course. Comes all the way from Porto Rico.

ISSUE OF JULY 19—

Cafeteria patronage increase noticed by staff of workers. Approximately 350 to 400 persons served each day.

Wakanda announced as scene for summer session picnic.

Katherine Spence of Appleton, Wis., senior high school, says she teaches home economics to boys, and they like it.

Lynwood wins first three games in city recreational league.

Leon Lassers gets appointment to teach in speech department of West Texas State Teacher's college, in Canyon, Texas.

Counseling class under Mrs. Katherine Wied, dean in Denfield high school of Duluth, ends successful three week session.

ISSUE OF JULY 23

William C. Bagley reveals all about his class in traffic and transportation at Racine vocational school.

More than 370 people served at summer session picnic. Only 285 attended picnic last year.

Hyperians hold summer session picnic under direction of Henrietta Quilling.

Given unique progressive party by Conrad Bechtold is elected president of the association of graduate men at the group's first meeting.

Coach and Mrs. Earl Burbridge the Grinnells, Dawleys, Shafers, Prices, and Robinsons.

Marguerite Roettiger has unique display of this and that on second floor corridor in H. E. building.

Furniture upholstery class takes trip to Twin Cities to furniture factories.

Lynwood holds top position in city recreational league.

H. M. Hanson, machine wood-work instructor, announces new construction course for following summer.

ISSUE OF JULY 26—

Lynwood and Viking kittenball teams scheduled to meet Monday, to determine championship of city recreational league.

Class in history of education journeys to University of Minnesota to study rare old books on education.

Three new placements recorded by Miss O'Brien, registrar.

Visual education class makes practical projects to use in individual teaching.

Charleston boasts of five men in the graduate school.

Painters and decorators refinish club room furniture under direction of Mr. Wigen.

Graduate work makes tremendous demand upon library. Many reference books added.

ISSUE OF TUESDAY, JULY 30—

Three one-act plays to be presented in auditorium, "Grandma, Old Style," "The Tea Pot on the Rocks," and "The Opera Matinee," under the direction of members of dramatic coaching class and Miss Hassler, dramatics instructor.

Graduate women hold picnic at Henrietta Quillings' cottage on Tainter lake.

H. C. Milnes, machine shop instructor studying graduate work at Ames, Iowa, elected to Psi Chi, honorary psychology fraternity.

Industrial mechanics class under direction of Harry F. Good, instructor, makes trip to Twin Cities to inspect power plants.

Tree falls on car at camp colony during wind storm.

Washington D.C. Asks Elementary Teachers

Word as been received from the public school system of the District of Columbus relative to examinations for elementary day school teachers, these examinations to be held October 4 and 5.

These examinations will determine eligibility for teachers in grades from kindergarten to the sixth, and salaries will range from \$1,400 to \$2,200. Each candidate will be required in addition to pass a satisfactory examination in physiology and hygiene with special reference to the nature and effects of alcoholic drinks and other narcotics upon the human system.

The prerequisites are that the candidate be a bona fide citizen of the United States, or that he has already taken out papers to become a naturalized citizen and has taken all steps necessary to complete his naturalization.

He must be of a good moral character, within the age limit, graduate of an accredited four-year high school.

The written examination will be held in the assembly hall, third floor, Franklin Administration building, Thirteenth and K streets, NW, beginning at 8:30 a. m. Friday, Oct. 4. It will extend for four hours in the morning and three and one-half in the afternoon.

The oral examination will be held in the same building on Oct. 4 or 5 in room 305.

The physical examination will be held on Saturday, Oct. 5.

Earlier in the year examinations were given for industrial arts teachers. Present examinations are solely for elementary teachers.

Further details about these examinations may be obtained from Miss O'Brien.

Graduates At Wausau See Demonstrations

Two Stout graduates, Rosamond Carlson and Velma Gutwasser spent last Monday in Wausau at Home Service demonstrations given by demonstrators of the Northern States Power company to its employees. Both women are employ-

ed by the power company to demonstrate in Wisconsin territory.

Women from Manitowoc, Green Bay, Menominee, Mich., Marinette, Stevens Point, Rhinelander, Oshkosh, and Chippewa Falls attended the demonstrations. Many of the women had either graduated from the two year course at Stout or had attended summer school here, according to Miss Carlson.

The program consisted of meat cookery demonstrations given by Miss Lucille Harris of the National Live Stock and Meat company. Miss Harris was a classmate of Miss Luella Wright, home economics education instructor when a classmate at Ames, Iowa.

CHARLTON TEBEAU VISITS DR. AND MRS. BOYD SHAFER

Charlton Tebeau, who taught in the history department in Dr. Shafer's position last summer while the Shafer's were in Europe, visited Dr. and Mrs. Shafer last week. All three were at the University of Iowa graduating about the same time.

At present Mr. Tebeau is educational director in the largest CCC camp in the United States at Glenview, Ill.

News Notes Gathered In Industrial Ed. Shops

The motor in Coach Burbridge's car has received a complete overhauling in the Stout auto mechanics shop a few days ago. A re-boring job was done, and Mr. Krantzsch says that although the job came in in very bad shape it is now running like an Elgin watch.

New springs have been put on the trailer that some day will carry the "some-day-to-be-finished" boat being constructed and added to by J. E. Ray, drawing instructor. A number of inquiries have been made

as to whether Jesse Ray expects to use the boat for duck hunting or ice boating.
